

# Audit Committee

**Thursday, 26 January 2023 at 6.30 p.m.  
Council Chamber - Town Hall, Mulberry Place, 5  
Clove Crescent, London, E14 2BG**

## Supplemental Agenda 3

### TREASURY MANAGEMENT REPORT

#### REASONS FOR URGENCY:

The attached reports were not published five clear days in advance of the meeting. Therefore, before the reports can be considered at this meeting, the Chair would need to be satisfied that it is necessary to consider the Treasury Management Reports. The delay has been in receiving the figures needed to produce the Treasury Management forecasts. The Audit committee needs to approve these reports prior to the Council considering these reports at Budget Council.

- 5 .4 Treasury Management Mid-Year Report for 2022-23 (Pages 3 - 24)**
- 5 .5 Treasury Management Strategy Statement, Investment Strategy Report and Capital Strategy Report for 2023-24 (Pages 25 - 76)**

<p><b>Report of:</b> Caroline Holland, Interim Corporate Director Resources</p>	<p><b>Classification:</b> Unrestricted</p>
<p><b>Treasury Management Mid-Year Report for 2022-23</b></p>	

<b>Originating Officer(s)</b>	Nisar Visram, Director of Finance, Procurement and Audit Miriam Adams, Interim Head of Pensions & Treasury
<b>Wards affected</b>	All wards

## Executive Summary

- 1) This report is produced in accordance with the CIPFA Treasury Management Code of Practice. The Treasury Management Strategy Statement and the Treasury Prudential Indicators for 2022-23 were approved by Council on 2<sup>nd</sup> March 2022 as required by the Local Government Act 2003. This report covers the period 1<sup>st</sup> April 2022 to 30<sup>th</sup> September 2022.
- 2) The Council has substantial sums of money invested and is therefore exposed to financial risks including the loss of invested funds and the impact of changing interest rates and inflation. The successful identification, monitoring and control of risks are therefore key to the Council's treasury management strategy.
- 3) To date £76m has been invested in pooled funds. The value of pooled funds at 30 September is currently at a loss of £5.5m however the Council continues to receive dividend income.
- 4) From the Benchmarking exercise, a total return 0.42% was achieved for the reporting period. This was below the benchmark average of 1.31%.
- 5) Over the reporting period, all treasury management activities were performed in accordance with the approved limits and the prudential indicators (PI) set out in the Council's Treasury Management Strategy Statement.

## **Recommendations:**

It is recommended to Audit Committee to:

- 1) Note the contents of the treasury management activities and performance against targets for the half year ending 30 September 2022; and
- 2) Note the Council's investments as set out in Appendix 1. The balances outstanding at 30 September 2022 was £247.3m.

## **1 REASONS FOR THE DECISIONS**

- 1.1 The Local Government Act 2003 and the Local Authorities Capital Financing and Accounting) Regulations 2003 require that regular reports be submitted to the relevant Council Committee detailing the Council's treasury management activities
- 1.2 This report updates members on both the borrowing and investment decisions made by the Corporate Director, Resources under delegated authority in the context of prevailing economic conditions and considers the Council's treasury management performance
- 1.3 The regular reporting of treasury management activities assists Members in scrutinising officer decisions and monitoring progress on the implementation of its investment strategy as approved by Council.

## **2 ALTERNATIVE OPTIONS**

- 2.1 The Council is bound by legislation to have regard to the Treasury Management TM Code. The Code requires that the Council or sub-committee of the Council (Audit Committee) should receive regular monitoring reports on treasury management activities. If the Council was to deviate from these requirements, there would need to be justifiable reason for doing so.

## **3 DETAILS OF THE REPORT**

### **Background to Treasury Management**

- 3.1 The Council's treasury management strategy was approved at the Council meeting of 1 March 2022. The Council has invested substantial sums of money and is therefore exposed to financial risks including the loss of invested pooled funds and the revenue effect of changing interest rates. The successful identification, monitoring and control of risk remains central to the Council's treasury management strategy.

- 3.2 The 2021 Prudential Code includes a requirement for local authorities to provide a Capital Strategy, a summary document approved by full Council covering capital expenditure and financing, treasury management and non-treasury investments. The Council's Capital Strategy, complying with CIPFA's requirement, was approved by full Council on 2 March 2022.

### **External Context**

- 3.3 **Economic background:** The conflict in Ukraine continued to keep global inflation elevated and the UK and global economic outlook remains weak. Political uncertainty in the UK improved in the later part of the period following a change in government to what financial markets perceived as being more fiscally prudent.

The economic backdrop in the last few months continues to be characterised by high energy and commodity prices, high inflation and the associated impact on consumers' cost of living, as well as little likelihood that the Russia-Ukraine hostilities will end any time soon.

- 3.4 Central Bank rhetoric and action continued to remain robust. The Bank of England, Federal Reserve and the European Central Bank all increased interest rates over the period and committed to fighting inflation, even in the face of potential recessions in those regions.

UK inflation remained high, but there were tentative signs it may have peaked. Annual headline CPI registered 10.7% in November, down modestly from 11.1% in October. RPI was 14% in November, down from 14.2% in October, but slightly above expectations for a larger fall to 13.9%.

- 3.5 The labour market remained tight but with some evidence of softening demand for new labour. Household disposal income remained under pressure, pushing consumer confidence down to a record low of -49 in September, but following months showed registered modest improvements to December's reading of -42.

- 3.6 Quarterly GDP for the April-June quarter was revised upwards to 0.2% (from -0.1%), following revisions to household and government spending, but fell by -0.3% in the July-September quarter, a larger decline than the -0.2% predicted.

The Bank of England increased the official Bank Rate to 3.5% over the period. From 0.75% in March, the Monetary Policy Committee (MPC) pushed through rises at every subsequent meeting over the period, with outsized hikes of 50bps in August and September, 75bps in November and then another 50bps in December. The Committee noted that domestic inflationary pressures are expected to remain strong and continuing rhetoric around combating inflation means further rate rises are predicted.

3.7 After hitting 9.1% in June, annual US inflation slowed for a further five consecutive months, with relatively strong falls in October to 7.7% and then in November to 7.1%. The Federal Reserve continued raising interest rates over the period with four consecutive increases of 0.75% in June, July, September, and November respectively, followed by 50bp in December taking policy rates to a range of 4.25% - 4.50%.

Eurozone CPI inflation hit a record-high of 10.6% y/y in October following rises in each month over the period. In November inflation fell to 10.1%, the first decline since June 2021. Energy prices remained the largest upward contribution to the price increase. The European Central Bank continued increasing interest rates over the period, pushing rates up by 0.50% in December following two consecutive months of 0.75% rises, taking the deposit facility rate to 2% and the main refinancing rate to 2.5%.

3.8 **Financial markets:** Uncertainty remained a key driver of financial market sentiment and bond yields remained relatively volatile due to concerns over elevated inflation and higher interest rates. In September and October, volatility in financial markets was significantly exacerbated by the fiscal plans of the then UK government. Leading to an acceleration in the rate of the rise in gilt yields and decline in the value of sterling. However, the subsequent change of government leadership lead to gilts yields falling in November and December, albeit at higher levels compared to earlier in the period.

3.9 **Credit review:** During the last few months of the period, in October Fitch Credit Rating Agency revised the outlook on the UK sovereign to negative from stable following the largely unfunded fiscal package announced at the time.

Over the same timeframe Moody's Credit Rating Agency also revised the UK sovereign to negative from stable, following swiftly after with a similar move for a number of local authorities and UK banks.

### Local Context

3.11 On 31<sup>st</sup> March 2022, the Council had net investments of £[233.125m arising from its revenue and capital income and expenditure. The underlying need to borrow for capital purposes is measured by the Capital Financing Requirement (CFR), while usable reserves and working capital are the underlying resources available for investment. These factors are summarised in Table 1 below.

Table 1: Balance Sheet Summary at 31 March 2022 (unaudited)

	31.3.22
--	---------

	Actual £m

<b>Net investments</b>	<b>251.328</b>	<b>-75.063</b>	<b>178.591</b>	

### Borrowing Update

- 3.13 CIPFA's 2021 Prudential Code is clear that local authorities must not borrow to invest primarily for financial return and that it is not prudent for local authorities

to make any investment or spending decision that will increase the capital financing requirement, and so may lead to new borrowing, unless directly and primarily related to the functions of the Authority. PWLB loans are no longer available to local authorities planning to buy investment assets primarily for yield unless these loans are for refinancing purposes.

### **Borrowing Strategy and Activity**

- 3.14 Although the Council has not borrowed in many years, however, should the Council decide to borrow, the Council's chief objective when borrowing would be to strike an appropriately low risk balance between securing low interest costs and achieving cost certainty over the period for which funds are required, with flexibility to renegotiate loans should the Council's long-term plans change being a secondary objective. The Council's borrowing strategy continues to address the key issue of affordability without compromising the longer-term stability of the debt portfolio.
- 3.15 The cost of both long and short term borrowing has risen dramatically over the April – December period, with rates at the end of December around 2% - 3% higher than those at the beginning of April. Rate rises have been driven primarily by inflation and the need for central banks to control this by raising interest rates. Particularly dramatic rises were seen in September. The PWLB 10 year maturity certainty rate stood at 4.59% at the end of 2022.
- 3.16 At 30 September 2022, the Council held £68.709m of loans, a decrease of £1.163m from 31<sup>st</sup> March 2022 position. Outstanding loans on 30<sup>th</sup> September are summarised in Table 3A below.

**Table 3A: Borrowing Position**

<b>Total borrowing</b>	<b>68.709</b>	<b>3.007</b>	

### Other Debt Activity

- 3.18 Although not classified as borrowing, the Council did not raise any new capital finance for Private Finance Initiative and finance leases between April 2022 and September 2022.

### Treasury Management Investment Activity

- 3.19 CIPFA revised TM Code defines treasury management investments as those which arise from the Authority's cash flows or treasury risk management activity that ultimately represents balances which need to be invested until the cash is required for use in the course of business.

The Authority holds £220.7m invested funds, representing income received in advance of expenditure plus balances and reserves held. During the period, the Authority's investment balances ranged between £220m and £330 million due to timing differences between income and expenditure. The investment position is shown in table 4 below.

- 3.20 Table 4: Treasury Investment Position at 30 September by Financial Sector

<b>Financial Sector</b>	<b>31.03.22 Balance £m</b>	<b>Movement over the Year £m</b>	<b>30.09.22 Balance £m</b>	<b>% Portfolio</b>
UK Banks	15.000	0.000	15.000	6.07%

<b>Total investments</b>	<b>321.200</b>	<b>-73.900</b>	<b>247.300</b>	

*\*Weighted average maturity will apply to the first five categories above and to cash plus and bond funds.*

- 3.21 Both the CIFA Code and government guidance require the Council to invest its funds prudently, and to have regard to the security and liquidity of its treasury investments before seeking the optimum rate of return, or yield. The Council’s objective when investing money is to strike an appropriate balance between risk and return, minimising the risk of incurring losses from defaults and the risk of receiving unsuitably low investment income.

Bank Rate has increased from 0.75% at the beginning of the period under review to 3.5% at the end, with the prospect of further increases to come. Short-dated cash rates, which had ranged between 0.7% - 1.5% at the end of March, rose by around 2.7% for overnight/7-day maturities and 3.0% for 6-12 month maturities.

The return on the Council’s sterling Low Volatility Net Asset Value (LVNAV) Money Market Funds ranged between 0.9% - 1.1% p.a. in early April and between 2.8% and 3.0% at the end of December

- 3.22 The progression of risk and return metrics are shown in the progression of risk and return metrics are shown in the extracts from Arlingclose’s quarterly investment benchmarking in Table 5 below.

Table 5: Investment Benchmarking – Treasury investments managed in-house

<b>Period</b>	<b>Credit Score</b>	<b>Credit Rating</b>	<b>Bail-in Exposure</b>	<b>Weighted Average Maturity (days)</b>	<b>Rate of Return (%)</b>
<b>31.03.2022</b>	4.40	AA-	59.0%	38	0.87%
<b>30.06.2022</b>	4.18	AA-	48.0%	46	1.29%
<b>30.09.2022</b>	3.22	AA	36.0%	60	2.85%
<b>Similar Las</b>	3.96	AA-	63.0%	36	1.31%
<b>All Las</b>	4.07	AA-	55.0%	18	1.47%

\*Weighted average maturity

3.23 **Externally Managed Pooled Funds:** £76.0m of the Authority's investments is invested in externally managed cash plus funds and strategic pooled funds investing in bonds, equity, multi-asset and property funds where short-term security and liquidity are lesser considerations, and the objectives instead are regular revenue income and long-term price stability. These funds generated an average total unrealised loss of 400k and £5.1m, comprising -3.8% and -10% capital return and 0.89% and 7.26% income return respectively.

3.24 Financial market volatility and uncertainty remain due to stagflation fears, little sight of the war in Ukraine ending soon and ongoing supply chain issues, a lingering problem yet to be fully resolved.

The change in the Authority's funds' capital values and income earned over the 6-month period is shown in Table 4.

Because these funds have no defined maturity date, but are available for withdrawal after a notice period, the Council's treasury adviser is currently in support of these investments being held by the Council on the understanding that strategic fund investments are made in the knowledge that capital values will move both up and down on months, quarters and even years; but with the confidence that over a three- to five-year period total returns should exceed cash interest rates.

The Authority had budgeted £2.27m income from its investments in 2022/23.

### **Non-Treasury Investments**

3.25 The definition of investments in CIPFA's revised 2021 Treasury Management Code covers all the financial assets of the Authority as well as other non-financial assets which the Authority holds primarily for financial return. Investments that do not meet the definition of treasury management investments (i.e. management of surplus cash) are categorised as either for service purposes (made explicitly to further service objectives) and or for commercial purposes (made primarily for financial return). Investment Guidance issued by the Department for Levelling Up Housing and Communities (DLUHC) and Welsh Government also broadens the definition of investments to include all such assets held partially or wholly for financial return.

3.26 The Council held investments made for service purposes:

- shareholding in subsidiaries £6m)
- loans to subsidiaries £2.175m

A full list of the Authority's non-treasury investments is available in the Council's statement of accounts.

### Treasury Performance

3.27 The Council measures the financial performance of its treasury management activities both in terms of its impact on the revenue budget and its relationship to benchmark interest rates, as shown in table 6 below.

Table 6: Forecast Performance at 30 September 2022

	Actual £m	Budget £m	Over/ under	Actual %
PWLB Interest Payable	1.325	1.490	-0.165	63.58%

## **Compliance**

3.28 The Corporate Director Resources reports that all treasury management activities undertaken during the year complied fully with the CIPFA Code of Practice and the Authority's approved Treasury Management Strategy Compliance with specific investment limits is demonstrated in table 7 below.

Compliance with the authorised limit and operational boundary for external debt is demonstrated in table 8 below.

### **Treasury Management Indicators**

3.30 The Council measures and manages its exposure to treasury management risks using the following indicators.

**Security:** The Authority has adopted a voluntary measure of its exposure to credit risk by monitoring the value-weighted average credit score of its

investment portfolio. This is calculated by applying a score to each investment (AAA=1, AA+=2, etc.) and taking the arithmetic average, weighted by the size of each investment. Unrated investments are assigned a score based on their perceived risk.

	31.03.22 Actual	30.09.22 Actual	2022.23 Target	Complied (Y/N)
Portfolio average credit	AA-	AA-	AA-	✓

**Liquidity:** The Authority has adopted a voluntary measure of its exposure to liquidity risk by monitoring the amount of cash available to meet unexpected payments within a rolling three-month period, without additional borrowing. The Council can borrow each period without giving prior notice as long as its within its CFR.

	31.03.22 Actual	30.09.22 Actual	2022/23 Target	Complied?
Total cash available within 3 months	225.200	96.300	£50.000	✓
Total sum borrowed in past 3 months without prior notice	nil	nil	nil	✓

3.31 **Maturity Structure of Borrowing:** This indicator is set to control the Authority's exposure to refinancing risk. The upper and lower limits on the maturity structure of all borrowing were:

	31.03.22 Actual	30.09.22 Actual	30.09.22 %	Upper Limit	Complied (Y/N)
Under 12 months	1.163	-	-	50%	✓
12 months and within 24 months	-	-	-	50%	✓
24 months and within 5 years	-	-	-	60%	✓
5 years and within 10 years	-	-	-	75%	✓
10 years and within 20 years	-	-	-	100%	✓
20 years and within 30 years	-	-	-	100%	✓
30 years and within 40 years	1.209	1.209	1.76%	100%	✓
40 years and above	67.500	67.500	98.24%	100%	✓
<b>Total Borrowing</b>	<b>69.872</b>	<b>68.709</b>	<b>100.00%</b>		

3.32 **Principal Sums Invested for Periods Longer than a year:** The purpose of this indicator is to control the Authority's exposure to the risk of incurring losses by seeking early repayment of its investments. The limits on the long-term principal sum invested to final maturities beyond the period end were:

	2022/23	2023/24	2024/25
Actual principal invested beyond year end	£76m	£76m	£76m
Limit on principal invested beyond year end	£150m	£150m	£150m
Complied?			

### **Arlingclose's Economic Outlook for the remainder of 2022/23**

- 3.33 The Council's treasury management adviser expects Bank Rate to rise further during the remainder of 2022/23 and to reach 4.25% by around the first quarter of the financial year 2023/24. Gilt yields are expected to remain broadly steady over the medium term, although with continued volatility across shorter time periods.

	Current	Mar-23	Jun-23	Sep-23	Dec-23	Mar-24	Jun-24	Sep-24	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25
Official Bank Rate													
Upside risk	0.00	0.50	0.75	1.00	1.00	1.00	1.25	1.50	1.75	1.50	1.25	1.25	1.25
Arlingclose Central Case	3.50	4.00	4.25	4.25	4.25	4.25	4.00	3.75	3.50	3.25	3.25	3.25	3.25
Downside risk	0.00	0.50	0.75	0.75	0.75	0.75	0.75	1.00	1.00	1.00	1.00	1.00	1.00

## **4. EQUALITIES IMPLICATIONS**

- 4.1 There are no equality implications directly arising from this report.

## **5. OTHER STATUTORY IMPLICATIONS**

- 5.1 This section of the report is used to highlight further specific statutory implications that are wither not covered in the main body of the report or are required to be highlighted to ensure decision makers give them proper consideration. Examples of other implications include:

- Best Value implications
- Consultations
- Environmental (including air quality)
- Risk management
- Crime Reduction
- Safeguarding
- Data protection/ Privacy Impact Assessment

### **5.2 Best Value Implications**

The Treasury Management Strategy and Investment Strategy and the arrangements put in place to monitor them should ensure that the Council optimises the use of its monetary resources within the constraints placed on

the Council by statute, appropriate management of risk and operational requirements.

Assessment of value for money is achieved through:

- Monitoring against benchmarks
- Operating within budget

### **5.3 Risk Management**

There is inevitably a degree of risk inherent in all treasury activities.

The Investment Strategy identifies the risk associated with different classes of investment instruments and sets the parameters within which treasury activities can be undertaken and controls and processes appropriate for that risk.

Treasury operations are undertaken by nominated officers within the parameters prescribed by the Treasury Management Policy Statement as approved by the Council.

The Council is ultimately responsible for risk management in relation to its treasury activities. However, in determining the risk and appropriate controls to put in place, the Council has obtained independent advice from Arlingclose who specialise in local authorities' treasury issues.

## **6 COMMENTS OF THE CHIEF FINANCE OFFICER**

6.1 This report provides an update on Treasury Management activities from April 2022 to September 2022.

6.2 As at the 30th September 2022 the Council had an outstanding investments portfolio of £241.8m. The revised annual investment income budget is £2.27m and current estimates indicate that this is achievable.

## **7. LEGAL COMMENTS**

7.1 The Local Government Act 2003 provides a framework for the capital finance of local authorities. It provides a power to borrow and imposes a duty on local authorities to determine an affordable borrowing limit. It provides a power to invest. Fundamental to the operation of the scheme is an understanding that authorities will have regard to proper accounting practices recommended by the Chartered Institute of Public Finance and Accountancy (CIPFA) in carrying out capital finance functions.

7.2 The Local Authorities (Capital Finance and Accounting) (England) Regulations 2003 require the Council to have regard to the various CIPFA publications that amount to proper accountancy practices when carrying out capital finance functions.

- 7.3 This noting report of the Corporate Director of Resources advises the Committee of the Council's borrowing and investment activities for the half-year ending 30th September 2022 and is consistent with the key principles expressed in the Treasury Management Code. The Corporate Director of Resources has responsibility for overseeing the proper administration of the Council's financial affairs, as required by section 151 of the Local Government Act 1972 and is the appropriate officer to advise in relation to these matters.
- 7.4 When considering its approach to the treasury management matters set out in the report, the Council must have due regard to the need to eliminate unlawful conduct under the Equality Act 2010, the need to advance equality of opportunity and the need to foster good relations between persons who share a protected characteristic and those who don't (the public sector equality duty).

## Appendix 2 – Glossary

Asset Life	How long an asset, e.g. a Council building is likely to last.
Bail-in	A bail-in is rescuing a financial institution on the brink of failure by making its creditors and depositors take a loss on their holdings rather than the government or taxpayers
Bail-out	A bailout is a colloquial term for the provision of financial help to a corporation or country which otherwise would be on the brink of failure or bankruptcy.
Borrowing Portfolio	A list of loans held by the Council.
Borrowing Requirements	The principal amount the Council requires to borrow to finance capital expenditure and loan redemptions.
Capitalisation direction or regulations	Approval from central government to fund certain specified types of revenue expenditure from capital resources.
CIPFA Code of Practice on Treasury Management	A professional code of Practice which regulates treasury management activities.
Capital Financing Requirement (CFR)	Capital Financing Requirement- a measure of the Council's underlying need to borrow to fund capital expenditure.
Certificates of Deposits	A certificate of deposit (CD) is a time deposit, a financial product. CDs are similar to savings accounts in that they are insured and thus virtually risk free; they are "money in the bank." They are different from savings accounts in that the CD has a specific, fixed term (often monthly, three months, six months, or one to five years) and, usually, a fixed interest rate. It is intended that the CD be held until maturity, at which time the money may be withdrawn together with the accrued interest.
Commercial paper	Commercial paper is a money-market security issued (sold) by large corporations to obtain funds to meet short-term debt obligations (for example, payroll), and is backed only by an issuing bank or corporation's promise to pay the face amount on the maturity date specified on the note. Since it is not backed by collateral, only firms with excellent credit ratings from a recognized credit rating agency will be able to sell their commercial paper at a reasonable price. Commercial paper is usually sold at a discount from face value, and carries higher interest repayment rates than bonds
Counterparties	Organisations or Institutions the Council lends money to e.g. Banks; Local Authorities and MMF.
Corporate bonds	A corporate bond is a bond issued by a corporation. It is a bond that a corporation issues to raise money effectively in order to expand its business. The term is usually applied to longer-term debt instruments, generally with a maturity date falling at least a year after their issue date.
Covered bonds	A covered bond is a corporate bond with one important enhancement: recourse to a pool of assets that secures or "covers" the bond if the originator (usually a financial

	institution) becomes insolvent. These assets act as additional credit cover; they do not have any bearing on the contractual cash flow to the investor, as is the case with Securitized assets.
Consumer Prices Index & Retail Prices Index (CPI & RPI)	The main inflation rate used in the UK is the CPI. The Chancellor of the Exchequer bases the UK inflation target on the CPI. The CPI inflation target is set at 2%. The CPI differs from the RPI in that CPI excludes housing costs. Also used is RPIX, which is a variation of RPI, one that removes mortgage interest payments.
Credit Default Swap (CDS)	A kind of protection that can be purchased by MMF companies from insurance companies (for their investment) in exchange for a payoff if the organisation they have invested in does not repay the loan i.e. they default.
Credit watch	Variety of special programs offered by credit rating agencies and financial institutions to monitor organisation/individual's (e.g. bank) credit report for any credit related changes. A credit watch allows the organisation/individuals to act on any red flags before they can have a detrimental effect on credit score/history.
Credit Arrangements	Methods of Financing such as finance leasing
Credit Ratings	A scoring system issued by credit rating agencies such as Fitch, Moody's and Standard & Poors that indicate the financial strength and other factors of a bank or similar Institution.
Debt Management Office (DMO)	The DMO is an agency of the HM Treasury which is responsible for carrying out the Government's Debt Management Policy.
Debt Rescheduling	The refinancing of loans at different terms and rates to the original loan.
Depreciation Method	The spread of the cost of an asset over its useful life.
Gilt	Gilt-edged securities are bonds issued by certain national governments. The term is of British origin, and originally referred to the debt securities issued by the Bank of England, which had a gilt (or gilded) edge. Hence, they are known as gilt-edged securities, or gilts for short. Today the term is used in the United Kingdom as well as some Commonwealth nations, such as South Africa and India. However, when reference is made to "gilts", what is generally meant is "UK gilts," unless otherwise specified.
Interest Rate exposures	A measure of the proportion of money invested and what impact movements in the financial markets would have on them.
The International Monetary Fund (IMF)	is an intergovernmental organisation which states its aims as to foster global monetary cooperation, secure financial stability, facilitate international trade, promote high employment and sustainable economic growth, and reduce poverty around the world.

Impaired investment	An investment that has had a reduction in value to reflect changes that could impact significantly on the benefits expected from it.
LIBID	The London Interbank Bid Rate – it is the interest rate at which major banks in London are willing to borrow (bid for) funds from each other.
Market Loans	Loans from banks available from the London Money Market including LOBOS (Lender Option, Borrowing Option) which enable the authority to take advantage of low fixed interest for a number of years before an agreed variable rate comes into force.
Money Market Fund (MMF)	A ‘pool’ of different types of investments managed by a fund manager that invests in lightly liquid short-term financial instruments with high credit rating.
Monetary Policy Committee (MPC)	Committee designated by the Bank of England whose main role is to regulate interest rates.
Minimum Revenue Provision (MRP)	This is the amount which must be set aside from the revenue budget each year to cover future repayment of loans.
Non-Specified Investments	Investments deemed to have a greater element of risk such as investments for longer than one year
Premium	Cost of early repayment of loan to PWLB to compensate for any losses that they may incur
Prudential Indicators	Set of rules providing local authorities borrowing for funding capital projects under a professional code of practice developed by CIPFA and providing measures of affordability and prudence reflecting the Council’s Capital Expenditure, Debt and Treasury Management.
PWLB	Public Works Loan Board, a statutory body whose function is to lend money to Local Authorities (LAs) and other prescribed bodies. The PWLB normally are the cheapest source of long - term borrowing for LAs.
SONIA	Sterling Overnight Indexed Average
Specified Investments	Investments that meet the Council’s high credit quality criteria and repayable within 12 months.
Supranational bonds	Supranational bonds are issued by institutions that represent a number of countries, not just one. Thus, organisations that issue such bonds tend to be the World Bank or the European Investment Bank. The issuance of these bonds is for the purpose of promoting economic development
Treasury bills (or T-bills)	Treasury bills (or T-bills) mature in one year or less. Like zero-coupon bonds, they do not pay interest prior to maturity; they are instead, sold at a discount of the par value to create a positive yield to maturity. Many regard Treasury bills as the least risky investment available.
Unrated institution	An institution that does not possess a credit rating from one of the main credit rating agencies.
Unsupported Borrowing	Borrowing where costs are wholly financed by the Council.

## Executive Summary

- 1) This report fulfils the Council’s legal obligation under the Local Government Act 2003 to have regard to both the CIPFA Code and the DLUHC Guidance on Treasury Management.
  
- 2) The Council is required by legislation and guidance to produce three strategy statements in relation to its treasury management arrangements. The three statements are:
  - a) Treasury Management Strategy Statement which sets out the Council’s strategy for the management of the Council’s treasury investments and debt portfolio, including potential new borrowing, for the financial year and establishes the parameters (prudential and treasury indicators) within which officers under delegated authority may undertake such activities.
  - b) Investment Strategy which sets out the Council’s service and commercial investments, its policies for managing existing investments and the governance/decision-making arrangements for new investments.
  - c) Capital Strategy Report which sets out an overview of how the Council’s capital expenditure, capital financing and treasury management activity contribute to the provision of local public services along with an overview of how associated risk is managed and the implications for future financial sustainability. The Capital Strategy Report incorporates the Minimum Revenue Provision (MRP) Policy Statement.
  
- 3) This report also covers the requirements of the 2021 Prudential Code and Treasury Management in the Public Services: Code of Practice 2021 Edition (the CIPFA TM

Code) and Department for Levelling Up Housing & Communities (DLUHC) issued revised Guidance on Local Authority Investments.

- 4) Clear delegated responsibility for overseeing and monitoring treasury management policies and practices and for the execution and administration of treasury management decisions is required. For this Council the delegated body is the Audit Committee. Officers will report details of the Council's treasury management activity to the Audit Committee through presentation of a mid-year and outturn report.
  
- 5) The CIPFA Code requires the responsible officer to ensure that members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny. Training will be arranged as required for members of the Audit Committee who are charged with reviewing and monitoring the Council's treasury management policies. The training of treasury management officers is also periodically reviewed and enhanced as appropriate.

### **Recommendations:**

It is recommended to Audit Committee to recommend to Council to:

- 1) Approve and adopt the following policy and strategies:
  - 1.1) The Treasury Management Strategy Statement contained in Appendix A;
  - 1.2) Approve the recommended investment counterparties and limits in Appendix A paragraph 5.8;
  - 1.3) The Investment Strategy Report contained in Appendix B;
  - 1.4) The Capital Strategy Report, which includes the Minimum Revenue Provision (MRP) Policy Statement, contained in Appendix C;
  - 1.5) The Prudential and Treasury Management indicators contained in Appendix D; and
  - 1.6) The Treasury Management Policy Statement as set out in Appendix E.

## **1 REASONS FOR THE DECISIONS**

- 1.1 The Council has adopted the relevant CIPFA Treasury Management and Prudential Codes and has regard to the DLUHC Investment Guidance (which came into force on 1<sup>st</sup> April 2018), as required to comply with the Local Government Act 2003. The guidance prescribes the production of

three strategy documents, to be approved by the Council before the start of the financial year to which they relate.

- 1.2 The Prudential Code for Capital Finance in Local Authorities (2021) produced by CIPFA guides the Council in the production of a framework designed to ensure that the Council's capital expenditure and financing plans are prudent, sustainable and affordable.
- 1.3 The Treasury Management in the Public Services: Code of Practice (2021) produced by CIPFA guides the Council in setting a risk management framework for the management of its surplus cash and new and existing borrowing.
- 1.4 The DLUHC Investment Guidance guides the Council in setting a decision-making, governance and risk management policy for its service and commercial investments.
- 1.5 The three strategy documents that the Council should produce are:
  - Treasury Management Strategy, including prudential indicators
  - Investment Strategy
  - Capital Strategy

## **2 ALTERNATIVE OPTIONS**

- 2.1 The Council is bound by legislation to have regard to the CIPFA Codes and DLUHC Investment Guidance. If the Council were to deviate from those requirements, there would need to be some good reason for doing so. It is not considered that there is any such reason, having regard to the need to ensure that the Council's capital investment plans are affordable, sustainable and prudent, and its treasury management activity is managed within an adequate risk control framework.

## **3 DETAILS OF THE REPORT**

### **Background to Treasury Management**

- 3.1 The Council is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when needed. Surplus monies are invested in low risk counterparties or instruments commensurate with the Council's low risk appetite, with adequate liquidity primarily, before considering investment return. A portion of the investment balance is invested on a long-term basis to preserve purchasing power and generate higher returns to support the revenue budget.
- 3.2 The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing

need of the Council, essentially the longer-term cash flow planning to ensure that the Council can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans or using longer term cash flow surpluses.

3.3 CIPFA defines treasury management as:

*“The management of the local authority’s investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”*

3.4 The Treasury Management Strategy Statement report forms part of an annual cycle of Committee and Council reports. The Council is required to receive and approve, as a minimum, three main reports each year, which incorporate a variety of policies, estimates and actuals.

- I. **A treasury management strategy statement** (Appendix A)
- II. **A mid-year treasury management report** – This will update members on year to date performance against the prudential and treasury indicators, amending indicators as necessary, and whether any policies require revision.
- III. **A treasury outturn report** – This provides details of annual actual performance against the prudential and treasury indicators.

3.5 The Council uses Arlingclose Limited as its external treasury management advisors. The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and officers will ensure that undue reliance is not placed upon the external service providers.

3.6 The CIPFA Code requires the responsible officer to ensure that members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny. Training will be arranged as required. The training needs of treasury management officers are periodically reviewed.

3.7 **The 2022-23 Strategy and Current Investment Position and Performance**

The Strategy for 2022-23 was approved by Full Council on 2nd March 2022 and the Audit Committee received a Treasury Management mid-year review on 26<sup>th</sup> January 2022 which stated that:

- a) The investment income budget for 2022-23 was £2.25m.
- b) From a benchmarking exercise, a total return of 1.17% was achieved for the reporting period, which was 0.27% below the average for similar Local Authorities return and 0.79% lower than the average return for all Local Authorities; and

- c) The Prudential Indicators and Treasury Management indicators have been fully complied with.

### **Treasury Management Strategy**

- 3.8 The Treasury Management Strategy Statement contained in Appendix A sets out the Council's proposed borrowing strategy, in the context of the U.K.'s economic outlook, credit outlook and interest rate forecast as well as the local context of the requirement to borrow. Given the significant cuts to public expenditure and in particular to local government funding, the Authority's borrowing strategy continues to address the key issue of affordability without compromising the longer-term stability of the debt portfolio.
- 3.9 The Council is undertaking a review of its borrowing strategy as set out in the TMSS, following the Capital Programme Review and the revised strategy will be reported to the Audit Committee.
- 3.10 The Authority had previously raised the majority of its long-term borrowing from the PWLB but will consider long-term loans from other sources including banks, pensions and local authorities, and will investigate the possibility of issuing bonds and similar instruments, in order to lower interest costs and reduce over-reliance on one source of funding in line with the CIPFA Code. On 25 November 2020, the government responded to the PWLB consultation by cutting the rate for all new Standard Rate loans from 1.80% to 1% (100 bps). PWLB loans are no longer available to local authorities planning to buy investment assets primarily for yield; the Authority intends to avoid this activity in order to retain its access to PWLB loans.
- 3.11 Alternatively, the Authority may arrange forward starting loans, where the interest rate is fixed in advance, but the cash is received in later years. This would enable certainty of cost to be achieved without suffering a cost of carry in the intervening period.
- 3.12 Any decisions will be reported to the appropriate decision making body at the next available opportunity. Please note that the borrowing of monies purely to lend on and make a return is unlawful and the Council will not engage in such activity.
- 3.13 Where spend is financed through the creation of debt, the Council is required to pay off an element of the accumulated capital spend each year. The payment is made through a revenue charge (the minimum revenue provision - MRP) made against the Council's expenditure, although it is also allowed to undertake additional voluntary payments if required (voluntary revenue provision - VRP). The MRP policy is set out in the capital strategy which is contained in Appendix C.

- 3.14 The Council has chosen to adopt a Voluntary Revenue Provision (VRP) to be charged to the HRA. This is in line with risks under consideration, the impact, and potential impact, on the Council's overall fiscal sustainability.
- 3.15 Although reducing, the Council holds significant invested funds, representing income received in advance of expenditure plus balances and reserves held. Both the CIPFA Code and the CLG Guidance require the Council to invest its funds prudently, and to have regard to the security and liquidity of its investments before seeking the highest rate of return, or yield. The Council's objective when investing money is to strike an appropriate balance between risk and return, minimising the risk of incurring losses from defaults and the risk of receiving unsuitably low investment income.
- 3.16 The investment strategy has been developed using the principle that the Council will also achieve optimum return on its investments commensurate with proper levels of security and liquidity. The Council's strategy is that given the risk and very low returns from short-term unsecured bank investments, the Authority will explore new opportunities for further diversification into more secure and/or higher yielding asset classes during 2022-23. The majority of the Authority's surplus cash remains invested in short-term unsecured bank deposits, money market funds and local authority deposits.
- 3.17 The proposed structure for selecting counterparties is set out in the TMSS. This methodology has been proposed by Arlingclose Limited and after review, is being proposed to the Council for adoption. The Council has not listed all of the counterparties that meet these criteria in an appendix, as these counterparties will naturally change over time. The Council, in conjunction with its treasury management advisor, Arlingclose, will use Fitch, Moodys and Standard and Poor's ratings to derive its credit criteria. The Council's treasury advisor alerts officers to changes in ratings of all agencies.
- 3.18 The Corporate Director Resources, has delegated responsibility to add or withdraw institutions from the counterparty list when circumstances change, either as advised by Arlingclose Limited (the Council's advisors) or from another reliable market source.

### **Investment Strategy Report 2022-23**

- 3.19 The Investment Strategy Report is contained in Appendix B. This strategy meets the requirement of the Guidance issued by Government in January 2018 and sets out the Council's Strategy in relation to supporting local public services by lending to or buying shares in other organisations and earning investment income other than investment returns in cash balance (commercial investments).

## **Capital Strategy Report for 2022-23**

- 3.20 This capital strategy report gives a high-level overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of local public services along with an overview of how associated risk is managed and the implications for future financial sustainability. It has been written in an accessible style to enhance members' understanding of these sometimes technical areas.
- 3.21 Decisions made this year on capital and treasury management will have financial consequences for the Authority for many years into the future. They are, therefore, subject to both a national regulatory framework and to local policy framework, summarised in this report.
- 3.22 The Capital Strategy Report is contained in Appendix C. The report sets out how the Capital Financing Requirement (CFR) for both the General Fund (GF) and the Housing Revenue Account (HRA) will change through to 2025-26, along with the Authorised Limit and the Operational Limit of borrowing and Prudential Indicators (PIs). Any shortfall of resources results in a borrowing need.

## **Other Treasury Management Issues**

- 3.23 In order to meet statutory requirements, clear delegated responsibility for overseeing and monitoring treasury management policies and practices and for the execution and administration of treasury management decisions rests with the Audit Committee. Officers will report details of the Council's treasury management activity to the Audit Committee through presentation of a mid-year and outturn report. The responsibilities and delegated decision-making path are set out in Appendices F and G.
- 3.24 The CIPFA Code requires the responsible officer to ensure that members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny, for whom training will be arranged as required. The training needs of treasury management officers are periodically reviewed and form part of the annual learning and development plan for individual officers.

## **4 EQUALITIES IMPLICATIONS**

- 4.1 The Equality Act 2010 requires the Council in the exercise of its functions to have due regard to eliminate unlawful discrimination, harassment and

victimisation, advance equality of opportunity and foster good relations between people who share a protected characteristic and those who do not.

- 4.2 Capital investment will contribute to achievement of the corporate objectives, including all those relating to equalities. Establishing the statutory policy statements required facilitates the capital investments and ensures that it is prudent.

## **5 OTHER STATUTORY IMPLICATIONS**

- a. This section of the report is used to highlight further specific statutory implications that are either not covered in the main body of the report or are required to be highlighted to ensure decision makers give them proper consideration. Examples of other implications may be:
- Best Value Implications,
  - Consultations,
  - Environmental (including air quality),
  - Risk Management,
  - Crime Reduction,
  - Safeguarding.
  - Data Protection / Privacy Impact Assessment.
- b. **Best Value Implications:** The Treasury Management Strategy, Investment Strategy, Capital Strategy and the arrangements put in place to monitor them should ensure that the Council optimises the use of its monetary resources within the constraints placed on the Council by statute, appropriate management of risk and operational requirements. Assessment of value for money is achieved through monitoring against benchmarks and operating within budget.
- c. **Risk Management:** There is inevitably a degree of risk inherent in all treasury activity. The Investment Strategy identifies the risk associated with different classes of investment instruments and sets the parameters within which treasury activities can be undertaken and controls and processes appropriate for that risk. Treasury operations are undertaken by nominated officers within the parameters prescribed by the Treasury Management Policy Statement as approved by the Council. The Council is ultimately responsible for risk management in relation to its treasury activities. However, in determining the risk and appropriate controls to put in place, the Council has obtained independent advice from Arlingclose who specialise in Local Authority treasury issues.

## **6 COMMENTS OF THE CHIEF FINANCE OFFICER**

- 6.1 This report contains the three strategy statements in relation to the Council's treasury management arrangements. As this report is totally financial in nature the comments of the Chief Finance Officer have been incorporated throughout this report.

## **7 COMMENTS OF LEGAL SERVICES**

- 7.1 The Local Government Act 2003 ('the 2003 Act') provides a framework for the capital finance of local authorities. It provides a power to borrow and imposes a duty on local authorities to determine an affordable borrowing limit. It provides a power to invest. Fundamental to the operation of the scheme is an understanding that authorities will have regard to proper accounting practices recommended by the Chartered Institute of Public Finance and Accountancy (CIPFA) in carrying out capital finance functions.
- 7.2 The Local Authorities (Capital Finance and Accounting) (England) Regulations 2003 ('the 2003 Regulations') require the Council to have regard to the CIPFA publication "Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes" ("the Treasury Management Code") in carrying out capital finance functions under the 2003 Act. If after having regard to the Treasury Management Code the Council wished not to follow it, there would need to be some good reason for such deviation.
- 7.3 It is a key principle of the Treasury Management Code that an authority should put in place "comprehensive objectives, policies and practices, strategies and reporting arrangements for the effective management and control of their treasury management activities". Treasury management activities cover the management of the Council's investments and cash flows, its banking, money market and capital market transactions, the effective control of risks associated with those activities and the pursuit of optimum performance consistent with those risks. It is consistent with the key principles expressed in the Treasury Management Code for the Council to adopt the strategies and policies proposed in the report.
- 7.4 The report proposes that the treasury management strategy will incorporate treasury and prudential indicators. The 2003 Regulations also requires the Council to have regard to the CIPFA publication "Prudential Code for Capital Finance in Local Authorities" ("the Prudential Code") when carrying out its duty under the Act to determine an affordable borrowing limit. The Prudential Code specifies a minimum level of prudential indicators required to ensure affordability, sustainability and prudence. The report properly brings forward these matters for determination by the Council. If after having regard to the Prudential Code the Council wished not to follow it, there would need to be some good reason for such deviation.
- 7.5 The Local Government Act 2000 and regulations made under the Act provide that adoption of a plan or strategy for control of a local authority's borrowing, investments or capital expenditure, or for determining the authority's minimum revenue provision, is a matter that should not be the sole responsibility of the authority's executive and, accordingly, it is appropriate for the Cabinet to agree these matters and for them to then be considered by Council.

- 7.6 The report sets out the recommendations of the Corporate Director Resources in relation to the Council's minimum revenue provision, treasury management strategy and its annual investment strategy. The Corporate Director Resources has responsibility for overseeing the proper administration of the Council's financial affairs, as required by section 151 of the Local Government Act 1972 and is the appropriate officer to advise in relation to these matters.
- 7.7 When considering its approach to the treasury management matters set out in the report, the Council must have due regard to the need to eliminate unlawful conduct under the Equality Act 2010, the need to advance equality of opportunity and the need to foster good relations between persons who share a protected characteristic and those who don't (the public sector equality duty).

---

## **1. Introduction**

- 1.1 Treasury management is the management of the Council's cash flows, borrowing and investments, and the associated risks. The Council has borrowed and invested substantial sums of money and is therefore exposed to financial risks including the loss of invested funds and the revenue effect of changing interest rates. The successful identification, monitoring and control of financial risk is therefore central to the Council's prudent financial management.
- 1.2 Treasury risk management in the Council is conducted within the framework of the Chartered Institute of Public Finance and Accountancy's *Treasury Management in the Public Services: Code of Practice 2021 Edition* (the CIPFA Code) which requires the Council to approve a treasury management strategy before the start of each financial year. This report fulfils the Council's legal obligation under the *Local Government Act 2003* to have regard to the CIPFA Code.
- 1.3 Investments held for service purposes or for commercial profit are considered in the Investment Strategy Report included with this TMSS report.
- 1.4 This TMSS forms part of the Council's overall budget strategy and financial management framework.

## **2 External Context**

**Economic background:** The ongoing impact on the UK from the war in Ukraine, together with higher inflation, higher interest rates, uncertain government policy, and a deteriorating economic outlook, will be major influences in the Council's treasury management strategy for 2023/24.

- 2.1 The Bank of England (BoE) increased Bank Rate by 0.5% to 3.25% in December 2022. This followed a 0.75% rise in November which was the largest single rate hike since 1989 and the ninth successive rise since December 2021. The December decision was voted for by a 6-3 majority of the Monetary Policy Committee (MPC), with two dissenters voting for a no-change at 3% and one for a larger rise of 0.75%.
- 2.2 The November quarterly Monetary Policy Report (MPR) but shallow recession in the UK with CPI inflation remaining elevated at over 10% in the near-term. While the projected peak of inflation is lower than in August report, due in part to the government's support package for household energy costs, inflation is expected remain higher for longer over the forecast horizon and the economic outlook remains weak with unemployment projected to star rising.

- 2.3 UK economy contracted by 0.3% between July and September 2022 according to the Office for National Statistics and BoE forecast Gross Domestic Product (GDP) will decline 0.75% in the second half of the calendar year due to the squeeze on household income from higher energy costs and goods prices. Growth is then expected to continue to fall throughout 2023 and the first half of 2024.
- 2.4 Interest rates have also been rising sharply in the US, with the Federal Reserve increasing the range on its key interest rate by 0.5% in December 2022 to 4.25%-4.5%. This rise follows four successive 0.75% rises in a pace of tightening that has seen rates increase from 0.25%-0.5% in March 2022. Annual inflation has been slowing in the US but remains above 7%.
- 2.5 Inflation rose consistently in the Euro Zone since the start of 2022, hitting a peak annual rate of 10.6% in October 2022, before declining to 10.1% in November. As with the UK and US, the European Central Bank has been on an interest rate tightening cycle, pushing up its three key interest rates by 0.50% in December, following two consecutive 0.75% rises, taking its main refinancing rate to 2.5% and deposit facility rate to 2.0%.
- 2.6 **Credit outlook:** Credit default swap (CDS) prices have generally followed an upward trend throughout 2022, indicating higher credit risk. CDS price volatility was higher in 2022 compared to 2021. The weakening economic picture during 2022 led the credit rating agencies to reflect this in their assessment of the outlook for the UK sovereign as well as several local authorities and financial institutions, revising them from stable to negative. The Council's counterparty list is based on institutions on our adviser Arlingclose's recommended counterparty list.
- 2.7 **Interest rate forecast:** The Council's treasury management advisor Arlingclose is forecasting that Bank Base Rate will continue to rise in 2023 as in 2022 due to the Bank of England's attempts to subdue inflation which is significantly above its 2% target.
- 2.8 Multiple interest rate rises are still expected over the continued forecast despite looming recession. Bank Rate central case forecast is expected to be 4.25% by June 2023 should inflation not evolve as the Bank forecasts and remains persistently higher.

### **3 Local Context**

- 3.1 For the purpose of setting the Council's budget and MTFs, it has been assumed that new treasury investments in 2023-24 will be made at an average rate range of 3.30% - 3.70% depending on duration and future Bank of England rate rises, and that new long-term loans will be borrowed at an average rate of 4.5%. However, reduction in cash balances will significantly impact interest earned on cash balances.

On 31st December 2022, the Council held £68.7m of borrowing and £225.4m of treasury investments. Forecast changes in these sums are shown in the balance sheet analysis in Table 1. Future estimates are based on current use of reserve forecast below based on presented to Cabinet on 26 January 2023 and current capital program.

**Table 1: Balance Sheet Summary Projections**

\* leases and PFI liabilities that form part of the Council's total debt

\*\* shows only loans to which the Council is committed

- 3.1 The underlying need to borrow for capital purposes is measured by the Capital Financing Requirement (CFR), while usable reserves and working capital are the underlying resources available for investment. The Council's current strategy is to maintain borrowing and investments below their underlying levels, sometimes known as internal borrowing. Actual internal borrowing on 31 March 2022 was £394.8m and forecast internal borrowing on 31 March 2023 is forecast at £422.9m. Internal borrowing represents the actual borrowing which is yet to be financed with external debt. By not borrowing to date the council has saved millions of pounds in debt interest. However, as level of reserves reduce and the capital program spend increases, the Council based on forecast is likely to borrow in 2023/24.
- 3.2 CIPFA's Prudential Code for Capital Finance in Local Authorities recommends that the Council's total debt should be lower than its highest forecast CFR over the next three years. Table 1 shows that the Council expects to comply with this recommendation between 2023-24 to 2025-26.

3.3 The Council has an increasing CFR due to the capital programme, but reducing investment balances and will therefore be required to borrow up to £637m over the forecast period (forecast internal borrowing to March 2026).

3.4 The table 2 below shows the Council's existing investment and debt portfolio on 31 December 2022.

### Existing Investment & Debt Portfolio Position

<b>Net Debt</b>	<b>101.795</b>	

## 4 Borrowing Strategy

4.1 The Council currently holds £68.71m of external borrowing, as part of its strategy for funding previous years' capital programmes. The balance sheet forecast in table 1 shows that should the capital program fully spends forecast spend, the Council is likely to borrow in 2023/24. However, with slippage in the program the borrowing requirement is likely to

be in 2024/25. However, current borrowing and future borrowing requirements by borrowing in advance of need, does not exceed the authorised limit for borrowing of £765.4m (2025-26).

- 4.2 **Liability benchmark:** To compare the Council’s actual borrowing against an alternative strategy, a liability benchmark has been calculated showing the lowest risk level of borrowing. This assumes the same forecasts as Table 1 above, but that cash and investment balances are kept to a minimum level of £56m at each year-end but minimise credit risk and maintain sufficient liquidity.

**Table 3: Liability benchmark**

	31.3.22 Actual £m	31.3.23 Estimate £m	31.3.24 Forecast £m	31.3.25 Forecast £m	31.3.26 Forecast £m
Loans CFR	464.675	491.63	555.161	659.773	705.736
Balance Sheet Resources - Useable capital	(600.900)	(503.300)	(322.400)	(256.600)	(206.700)
Balance Sheet Resources - Working capital	(96.900)	(96.900)	(96.900)	(96.900)	(96.900)
Net Loans Requirement	(233.125)	(108.57)	135.861	306.273	402.136
<i>Liquidity Allowance</i>	56.000	56.000	56.000	56.000	56.000
<b>Liability benchmark</b>	<b>(177.125)</b>	<b>(52.570)</b>	<b>191.861</b>	<b>362.273</b>	<b>458.136</b>

The liability benchmark suggests the Council will require a minimum level of borrowing in 2023-24 of £191.9m, to maintain the minimum investment level of £56m at year end. This £56m represents the nominal value of strategic funds the Council invested in for long term purposes, these can however be sold if need be. Current loss on these funds is £4.5m. The actual level of borrowing at year end depends on whether the Council’s spending plans proceed as planned and on the actual timing of borrowing as well as level of internal cash.

- 4.3 **Objectives:** The Council’s main objective when borrowing money is to strike an appropriately low risk balance between securing low interest costs and achieving certainty of those costs over the period for which funds are required. The flexibility to renegotiate loans should the Council’s long-term plans change is a secondary objective.
- 4.4 **Strategy:** The Council’s borrowing strategy continues to address the key issue of affordability without compromising the longer-term stability of the debt portfolio. With short-term interest rates currently slightly lower than long-term rates, it is likely to be more cost effective in the short-term to either use internal resources, or to borrow short-term loans instead.
- 4.5 By doing so, the Council is able to reduce net borrowing costs (despite foregone investment income) and reduce overall treasury risk. The benefits of internal borrowing

or short-term borrowing will be monitored regularly against the potential for incurring additional costs by deferring borrowing into future years when long-term borrowing rates are forecast to rise and maintaining liquidity. Council officers are able to draw on borrowing advice as required to ascertain whether the Council borrows additional sums at long-term fixed rates in 2022/23 with a view to keeping future interest costs low.

4.6 The Council will seek to strike a balance between using internal resources, cheap short-term loans (currently available at around 3.5% - 4.30%) and long-term fixed rate loans where the future cost is known but higher. PWLB loans are no longer available to local authorities planning to buy investment assets primarily for yield, the Council intends to avoid this activity in order to retain its access to PWLB loans. there are several other factors that the Council needs to consider when setting its borrowing strategy.

4.7 As shown in the table below, the Council is planning to significantly increase its capital expenditure over the next 3 years; the forecast capital programme expenditure is £628.2m over the next 3 financial years (2023-24 to 2025-26). This plan is for the programme to be partly funded by borrowing of £225.1m (£67.44m in the General Fund for 2023-24 to 2025-26 and £187.65m in the HRA for the same period). The plan is for the rest of the programme to be funded by other sources including payments from developers (Developers contributions – CIL, Section 106 and lease holder contributions), capital receipts, revenue contributions and Right to Buy/MRR receipts (the HRA). However, in previous years, the capital programme has had slippage, including the current year.

**Table 4 demonstrating Capital Expenditure**

<b>Capital Expenditure</b>	<b>2021-22 Actual (draft) £m</b>	<b>2022-23 Estimate £m</b>	<b>2023-24 Estimate £m</b>	<b>2024-25 Estimate £m</b>	<b>2025-26 Estimate £m</b>
Non-HRA	106.331	111.867	122.281	80.875	35.482
HRA	52.102	74.458	156.185	139.331	94.109
<b>Total</b>	<b>158.433</b>	<b>188.325</b>	<b>278.466</b>	<b>220.206</b>	<b>129.591</b>

4.8 The Council had previously raised the majority of its long-term borrowing from the PWLB but will consider long-term loans from other sources including banks, pension funds and local authorities, and will investigate the possibility of issuing bonds and similar instruments, in order to lower interest costs and reduce over-reliance on one source of funding in line with the CIPFA Code. PWLB loans are no longer available to local authorities planning to buy investment assets primarily for yield; the Council intends to avoid this activity in order to retain its access to PWLB loans.

4.9 If necessary and in rising interest rate environment, the Council may arrange forward starting loans, where the interest rate is fixed in advance, but the cash is received in later years. This would enable certainty of cost to be achieved without suffering a cost of carry in the intervening period. The Council may additionally borrow short-term loans to cover unplanned cash flow shortages.

4.10 **Sources of borrowing:** The approved sources of long-term and short-term borrowing are:

- HM Treasury's PWLB Lending Facility (formerly the Public Works Loan Board)
- any institution approved for investments (see below)
- any other bank or building society authorised to operate in the UK
- any other UK public sector body
- UK public and private sector pension funds (except the London Borough of Tower Hamlets Pension Fund)
- capital market bond investors
- UK Municipal Bonds Agency plc and other special purpose companies created to enable local authority bond issues

4.11 **Other sources of debt finance:** In addition, capital finance may be raised by the following methods that are not borrowing, but may be classed as other debt liabilities:

- leasing
- hire purchase
- Private Finance Initiative
- sale and leaseback

4.12 **Municipal Bonds Agency:** UK Municipal Bonds Agency plc was established in 2014 by the Local Government Association as an alternative to the PWLB. It issues bonds on the capital markets and lends the proceeds to local authorities. This is a more complicated source of finance than the PWLB for two reasons: borrowing authorities will be required to provide bond investors with a guarantee to refund their investment in the event that the agency is unable to for any reason; and there will be a lead time of several months between committing to borrow and knowing the interest rate payable. Any decision to borrow from the Agency will therefore be the subject of a separate report to full Council.

4.13 **Short-term and variable rate loans:** These loans may leave the Council exposed to the risk of short-term interest rate rises and are therefore subject to the interest rate exposure limits in the treasury management indicators below. The Council will avoid variable rate loans except on advice.

4.14 **Debt rescheduling:** The recent rise in interest rates means that more favourable debt rescheduling opportunities should arise than in previous years. The PWLB allows authorities to repay loans before maturity and either pay a premium or receive a discount

according to a set formula based on current interest rates. Other lenders may also be prepared to negotiate premature redemption terms. The Council may take advantage of this and replace some loans with new loans, or repay loans without replacement, where this is expected to lead to an overall cost saving or a reduction in risk.

## **5 Treasury Investment Strategy**

- 5.1 The Council holds significant invested funds, representing grants, CIL, S106 and other income received in advance of expenditure plus balances and reserves held. In the past 12 months, the Council's treasury investment balance has ranged between £200 million and £340 million a lot of which has been due to temporary increase in reserves, covid and related grants received not immediately spent.
- 5.2 The CIPFA Code requires the Council to invest its treasury funds prudently, and to have regard to the security and liquidity of its investments before seeking the highest rate of return, or yield. The Council's objective when investing money is to strike an appropriate balance between risk and return, minimising the risk of incurring losses from defaults and the risk of receiving unsuitably low investment income.
- 5.3 **Strategy:** As demonstrated by the liability benchmark in table 3, since capital expenditure is not fully funded with Council resources, capital receipts or grants, the Council expects to be a long-term borrower and new or existing treasury investments will therefore be made primarily to manage day-to-day cash flows using short-term low risk instruments. The existing portfolio of strategic pooled funds will be maintained to diversify risks into different sectors and boost investment income as applicable.
- 5.4 **Business models:** Under the new IFRS 9 standard, the accounting for certain investments depends on the Council's "business model" for managing them. The Council aims to achieve value from its treasury investments by a business model of collecting the contractual cash flows and therefore, where other criteria are also met, these investments will continue to be accounted for at amortised cost.
- 5.5 **Environmental Social and Governance (ESG):** Environmental, social and governance (ESG) considerations are increasingly a factor in global investors' decision making, but the framework for evaluating investment opportunities is still developing. The CIPFA Treasury Management Code requires local authorities to consider their counterparty policies in light of ESG information, while recognising that there is not a developed approach to ESG for public sector organisations and not expecting authorities to use real-time ESG scoring/criteria for individual investments. There are currently no definitive criteria.

- 5.6 Where possible, the Council will consider banks and funds who are signatories to the UN Principles for Responsible Banking and funds operated by managers that are signatories to the UN Principles for Responsible Investment, the Net Zero Asset Manager Alliance and /or the UK Stewardship Code.
- 5.7 As at 31 December, five of the six banks the Council invested fixed deposits with are signatories of the UN Principles for Responsible Banking. Managers and Money Market Funds the Council has invested in are signatories of UN Principles for Responsible Investment, UK Stewardship Code 2020 and Net-Zero Asset Managers Initiative. However, the Funds themselves are not necessarily Climate or ESG fully compliant.
- 5.8 **Approved counterparties:** The Council may invest its surplus funds with any of the counterparty types in Table 5 below, subject to the limits shown.

**Table 5: Recommended investment counterparties and limits**

Sector	Time limit	Counterparty limit	Sector limit
The UK Government	50 years	Unlimited	n/a
Local authorities & other government entities ( <i>subject to checks on their balance sheet position, current financial status and Statement of accounts depending on duration</i> )	25 years	£25m	Unlimited
Secured investments *	25 years	£25m	Unlimited
Banks (unsecured) *	13 months	£15m	Unlimited
Building societies (unsecured) *	13 months	£15m	£30m
Registered providers (unsecured) *	5 years	£15m	£75m
Money market funds *	n/a	£30m	Unlimited
Strategic pooled funds*	n/a	£30m	£150m
Real estate investment trusts	n/a	£35m	£75m
Other investments *	5 years	£15m	£30m

*This table must be read in conjunction with the notes below*

**Minimum Credit rating:** Treasury investments in the sectors marked with an asterisk will only be made with entities whose lowest published long-term credit rating is not lower than A-. Where available, the credit rating relevant to the specific investment or class of investment is used, otherwise the counterparty credit rating is used. However, investment decisions are never made solely based on credit ratings, and all other relevant factors including external advice will be taken into account during decision making. This is monitored on a regular basis in liaison with our Advisors.

For entities without published credit ratings, investments may be made where external advice indicates the entity to be of similar credit quality following an external credit assessment.

- 5.9 **Government:** Loans, bonds and bills issued or guaranteed by, national governments, regional and local authorities, and multilateral development banks. These investments are not subject to bail-in, and there is generally a lower risk of insolvency, although they are not zero risk. Investments with the UK Government are deemed to be zero credit risk due to its ability to create additional currency and therefore may be made in unlimited amounts for up to 50 years.
- 5.10 **Secured Investments:** These are investments secured on the borrower's assets, which limits the potential losses in the event of insolvency. The amount and quality of the security will be a key factor in the investment decision. Covered bonds and reverse repurchase agreements with banks and building societies are exempt from bail-in. Where there is no investment specific credit rating, but the collateral upon which the investment is secured has a credit rating, the higher of the collateral credit rating and the counterparty credit rating will be used. The combined secured and unsecured investments with any one counterparty will not exceed the cash limit for secured investments.
- 5.11 **Banks and Building Societies (unsecured):** Accounts, deposits, certificates of deposit and senior unsecured bonds with banks and building societies, other than multilateral development banks. These investments are subject to the risk of credit loss via a bail-in should the regulator determine that the bank is failing or likely to fail. See below for arrangements relating to operational bank accounts.
- 5.12 **Registered Providers:** Loans to, and bonds issued by or guaranteed by or secured on the assets of registered providers of social housing and registered social landlords, formerly known as housing associations. These bodies are tightly regulated by the Regulator of Social Housing (in England), the Scottish Housing Regulator, the Welsh Government, and the Department for Communities (in Northern Ireland). As providers of public services, they retain the likelihood of receiving government support if needed.
- 5.13 **Money Market Funds (MMFs):** Pooled funds that offer same-day or short notice liquidity and very low or no price volatility by investing in short-term money markets. They have the advantage over bank accounts of providing wide diversification of investment risks, coupled with the services of a professional fund manager in return for a small fee. Although no sector limit applies to money market funds, the Council will exercise due care by diversifying its liquid investments across various providers, to ensure access to cash at all times. It is worth noting that in the event of very significant economic crashes

when Central Banks reduce rates to the extent that rates become negative, MMFs will become Variable Net Asset Values and / or accumulating funds.

**5.14 Strategic Pooled Funds:** Bond, equity and property funds that offer enhanced returns over the longer-term but are more volatile in the short-term. These allow the Council to diversify into asset classes other than cash without the need to own and manage the underlying investments. As these funds have no defined maturity date, but are available for withdrawal after a notice period, their performance and continued suitability in meeting the Council's investment objectives will be monitored regularly.

**5.15 Real Estate Investment Trusts (REITS):** Shares in companies that invest mainly in real estate and pay most of their rental income to investors in a similar manner to pooled property funds. As with property funds, REITs offer enhanced returns over the longer term, but are more volatile especially as the share price reflects changing demand for the shares as well as changes in the value of the underlying properties. Investments in REIT shares cannot be withdrawn but can be sold on the stock market to another investor.

**5.16 Other Investments:** This category covers treasury investments not listed above, for example, unsecured corporate bonds and company loans. Non-bank companies cannot be bailed-in but can become insolvent placing the Council's investment at risk.

**5.17 Operational Bank Accounts:** The Council may incur operational exposures, for example through current accounts, collection accounts and merchant acquiring services to any UK bank with credit ratings not lower than BBB- and with assets greater than £25 billion. These are not classed as investments but are still subject to the risk of a bank bail-in, and balances will therefore be kept below £2m if it falls below the minimum bank credit rating referred to in 5.7. The Bank of England has stated that in the event of failure, banks with assets greater than £25 billion are more likely to be bailed-in than made insolvent, increasing the chance of the Council maintaining operational continuity.

**5.18 Risk Assessment and Credit Ratings:** Credit ratings are obtained and monitored by the Council's treasury advisers, who will notify changes in ratings as they occur. The credit rating agencies in current use are listed in the Treasury Management Practices document. Where an entity has its credit-rating downgraded so that it fails to meet the approved investment criteria then:

- no new investments will be made,
- any existing investments that can be recalled or sold at no cost will be, and
- full consideration will be given to the recall or sale of all other existing investments with the affected counterparty.

**5.19** Where a credit rating agency announces that a credit rating is on review for possible downgrade (also known as "negative watch") which may make it fall below the approved

rating criteria, then only investments that can be withdrawn [on the next working day] will be made with that organisation until the outcome of the review is announced. This policy will not apply to negative outlooks, which indicate a long-term direction of travel rather than an imminent change of rating.

**5.20 Other information on the security of investments:** The Council understands that credit ratings are good, but not perfect, predictors of investment default. Full regard will therefore be given to other available information on the credit quality of the organisations in which it invests, including credit default swap prices, financial statements, information on potential government support, reports in the quality financial press and analysis and advice from the Council's treasury management adviser. No investments will be made with an organisation if there are substantive doubts about its credit quality, even though it may otherwise meet the above criteria.

When deteriorating financial market conditions affect the creditworthiness of all organisations, as happened in 2008 and 2020, this is not generally reflected in credit ratings, but can be seen in other market measures. In these circumstances, the Council will restrict its investments to those organisations of higher credit quality and reduce the maximum duration of its investments to maintain the required level of security. The extent of these restrictions will be in line with prevailing financial market conditions. If these restrictions mean that insufficient commercial organisations of high credit quality are available to invest the Council's cash balances, then the surplus will be deposited with the UK Government or with other local authorities. This will cause investment returns to fall but will protect the principal sum invested.

**5.21 Investment limits:** In order that no more than approximately 25% of available reserves for credit losses will be put at risk in the case of a single default, the maximum that will be lent to any one organisation (other than the UK Government) will be £30 million. A group of banks under the same ownership will be treated as a single organisation for limit purposes.

**5.22** Limits are also placed on fund managers, investments in brokers' nominee accounts, foreign countries, and industry sectors as below. Investments in pooled funds and multilateral development banks do not count against the limit for any single foreign country since the risk is diversified over many countries.

**Table 6 demonstrating Additional Investment limits**

	<b>Cash Limit</b>
Any group of pooled funds under the same management	£75m per manager
Negotiable instruments held in a broker's nominee account	£75m per broker
Foreign countries	£30m per country

5.23 **Liquidity management:** The Council uses a cash flow forecasting model to determine the maximum period for which funds may prudently be committed. The forecast is compiled on a prudent basis to minimise the risk of the Council being forced to borrow on unfavourable terms to meet its financial commitments. Limits on long-term investments are set by reference to the Council’s medium-term financial plan and cash flow forecast. The Council will spread its liquid cash over at least four providers (e.g., bank accounts and money market funds) to ensure that access to cash is maintained in the event of operational difficulties at any one provider.

## 6 Treasury Management Indicators

6.1 The Council measures and manages its exposures to treasury management risks using the following indicators:

6.2 **Security:** The Council has adopted a voluntary measure of its exposure to credit risk by monitoring the value-weighted average credit rating of its investment portfolio. This is calculated by applying a score to each investment (AAA=1, AA+=2, etc.) and taking the arithmetic average, weighted by the size of each investment. Unrated investments are assigned a score based on their perceived risk.

Credit risk indicator	Target	Minimum
Portfolio average credit rating	A	A-

6.3 **Liquidity:** The Council has adopted a voluntary measure of its exposure to liquidity risk by monitoring the amount of cash available to meet unexpected payments within a rolling three-month period, without additional borrowing.

Liquidity risk indicator	Target
Total cash available within 3 months	£30m

6.4 **Interest rate exposures:** This indicator is set to control the Council’s exposure to interest rate risk. The upper limits on the one-year revenue impact of a 1% rise or fall in interest rates will be:

Interest rate risk indicator	Limit
Upper limit on one-year revenue impact of a 1% <u>rise</u> in interest rates	£2m
Upper limit on one-year revenue impact of a 1% <u>fall</u> in interest rates	£2m

6.5 The impact of a change in interest rates is calculated on the assumption that maturing loans and investments will be replaced at new market rates.

6.6 **Maturity structure of borrowing:** This indicator is set to control the Council’s exposure to refinancing risk. The upper and lower limits on the maturity structure of borrowing will be:

<b>Refinancing rate risk indicator</b>	<b>Upper limit</b>	<b>Lower limit</b>
Under 12 months	50%	0%
12 months and within 24 months	50%	0%
24 months and within 5 years	60%	0%
5 years and within 10 years	75%	0%
10 years and within 20 years	100%	0%
20 years and within 30 years	100%	0%
30 years and within 40 years	100%	0%
40 years and above	100%	0%

6.7 Time periods start on the first day of each financial year. The maturity date of borrowing is the earliest date on which the lender can demand repayment.

6.8 **Long-term Treasury management investments:** The purpose of this indicator is to control the Council’s exposure to the risk of incurring losses by seeking early repayment of its investments. The prudential limits on the long-term treasury investments will be:

<b>Price risk indicator</b>	<b>2023-24</b>	<b>2024-25</b>	<b>2025-26</b>
Limit on principal invested beyond year end/ no fixed maturity date	£150m	£150m	£125m

## **7 Related Matters**

7.1 The CIPFA Code requires the Council to include the following in its treasury management strategy.

7.2 **Financial Derivatives:** The Council will only use standalone financial derivatives (such as swaps, forwards, futures, and options) where they can be clearly demonstrated to reduce the overall level of the financial risks that the Council is exposed to. Additional risks presented, such as credit exposure to derivative counterparties, will be considered when determining the overall level of risk. Embedded derivatives, including those present in pooled funds and forward starting transactions, will not be subject to this policy,

although the risks they present will be managed in line with the overall treasury risk management strategy.

7.3 In line with the CIPFA Code, the Council will seek external advice and will consider that advice before entering into financial derivatives to ensure that it fully understands the implications.

**7.4 Housing Revenue Account:** The Council maintains two loan pools General Fund and HRA. Loans are assigned in their entirety to two pools. Interest payable and other costs/income arising from long-term loans (e.g., premiums and discounts on early redemption) are charged/credited to the respective revenue account. Differences between the value of the HRA loans pool and the HRA's underlying need to borrow (adjusted for HRA balance sheet resources available for investment) will result in a notional cash balance which may be positive or negative. This balance is measured each month and interest transferred between the General Fund and HRA at the Council's average interest rate on investments, adjusted for credit risk.

**7.5 External Funds:** From time to time, the Council may hold funds on behalf of other bodies will be separated where possible from the Council's cash via separate bank accounts or separate ledger codes. Where possible interest will be apportioned, and appropriate impairment losses applied as necessary.

**7.6 Markets in Financial Instruments Directive (MiFID):** The Council has opted up to professional client status with its providers of financial services, including advisers, banks, brokers, and fund managers, allowing it access to a greater range of services but without the greater regulatory protections afforded to individuals and small companies. Given the size and range of the Council's treasury management activities, the Chief Financial Officer believes this to be the most appropriate status.

## **8 Financial Implications**

8.1 The budget for investment income in 2022-23 is £2.27m and for 2023-24 is £2.00m, based on prudent assumptions made for the returns on the Council's various treasury investments including the pooled fund portfolio and term deposits, cash rates and forecast level of cash balances. The budget for debt interest payable in 2022-23 is £2.25m, while the budget for 2023-24 is £3.29m (£2.25m plus growth of £1.14m) being agreed as part of the Council's 2023-24 Medium Term Financial Strategy. If actual levels of investments and borrowing, or actual interest rates, differ from that forecast, performance against budget will be correspondingly different.

8.2 The revised budget for MRP in 2022-23 is £13.015m and for 2023-24 £17.235m.

## 9 Other Options Considered

9.1 The CIPFA Code does not prescribe any particular treasury management strategy for local authorities to adopt. The Chief Financial Officer, having consulted with the treasury advisers Arlingclose, the Cabinet Member for Resources and Corporate Leadership Team believes that the above strategy represents an appropriate balance between risk management and cost effectiveness. Some alternative strategies, with their financial and risk management implications, are listed below.

<b>Alternative</b>	<b>Impact on income and expenditure</b>	<b>Impact on risk management</b>
Invest in a narrower range of counterparties and/or for shorter times	Interest income will be lower	Lower chance of losses from credit related defaults, but any such losses may be greater due to amount invested in each counterparty
Invest in a wider range of counterparties and/or for longer times	Interest income will be higher	Increased risk of losses from credit related defaults, but any such losses may be smaller
Borrow additional sums at long-term fixed interest rates	Debt interest costs will rise; this is unlikely to be offset by higher investment income	Higher investment balance leading to a higher impact in the event of a default; however long-term borrowing interest costs may be more certain
Borrow short-term or variable loans instead of long-term fixed rates	Debt interest costs will initially be lower	Increases in debt interest costs will be broadly offset by rising investment income in the medium term, but long-term costs may be less certain
Reduce level of borrowing	Saving on debt interest is likely to exceed lost investment income	Reduced investment balance leading to a lower impact in the event of a default; however long-term interest costs may be less certain

## **Appendix A1 – Arlingclose Economic & Interest Rate Forecast December 2022**

### **Underlying assumptions:**

- The influence of the mini-budget on rates and yields continues to wane following the more responsible approach shown by the new incumbents of Downing Street.
- Volatility in global markets continues, however, as investors seek the extent to which central banks are willing to tighten policy, as evidence of recessionary conditions builds. Investors have been more willing to price in the downturn in growth, easing financial conditions, to the displeasure of policymakers. This raises the risk that central banks will incur a policy error by tightening too much.
- The UK economy is already experiencing recessionary conditions and recent GDP and PMI data suggests the economy entered a technical recession in Q3 2022. The resilience shown by the economy has been surprising, despite the downturn in business activity and household spending. Lower demand should bear down on business pricing power – recent data suggests the UK has passed peak inflation.
- The lagged effect of the sharp tightening of monetary policy, and the lingering effects of the mini-budget on the housing market, widespread strike action, alongside high inflation, will continue to put pressure on household disposable income and wealth. The short- to medium-term outlook for the UK economy remains bleak.
- Demand for labour appears to be ebbing, but not quickly enough in the official data for most MPC policymakers. The labour market remains the bright spot in the economy and persisting employment strength may support activity, although there is a feeling of borrowed time. The MPC focus is on nominal wage growth, despite the huge real term pay cuts being experienced by the vast majority. Bank Rate will remain relatively high(er) until both inflation and wage growth declines.
- Global bond yields remain volatile as investors price in recessions even as central bankers push back on expectations for rate cuts in 2023. The US labour market remains tight and the Fed wants to see persistently higher policy rates, but the lagged effects of past hikes will depress activity more significantly to test the Fed's resolve.
- While the BoE appears to be somewhat more dovish given the weak outlook for the UK economy, the ECB seems to harbour (worryingly) few doubts about the short term direction of policy. Gilt yields will be broadly supported by both significant new bond supply and global rates expectations due to hawkish central bankers, offsetting the effects of declining inflation and growth.

## Forecast:

- The MPC raised Bank Rate by 50bps to 3.5% in December as expected, with signs that some members believe that 3% is restrictive enough. However, a majority of members think further increases in Bank Rate might be required. Arlingclose continues to expect Bank Rate to peak at 4.25%, with further 25bps rises February, March and May 2023.
- The MPC will cut rates in the medium term to stimulate a stuttering UK economy, but will be reluctant to do so until wage growth eases. We see rate cuts in the first half of 2024.
- Arlingclose expects gilt yields to remain broadly steady over the medium term, although with continued volatility across shorter time periods.
- Gilt yields face pressures to both sides from hawkish US/EZ central bank policy on one hand to the weak global economic outlook on the other. BoE bond sales and high government borrowing will provide further underlying support for yields.

**PWLB Certainty Rate (Maturity Loans) = Gilt yield + 0.80%**

**PWLB Infrastructure Rate (Maturity Loans) = Gilt yield + 0.60%**

**1. Introduction**

- 1.1 The Authority invests its money for two broad purposes:
- it has surplus cash as a result of its day-to-day activities, for example when income is received in advance of expenditure (known as treasury management investments), and
  - to support local public services by lending to or buying shares in other organisations (service investments).
- 1.2 This investment strategy meets the requirements of the statutory guidance issued by the government in January 2018.

**2. Treasury Management Investments**

- 2.1 The Authority typically receives its income in cash (e.g. from taxes, grants and fees & charges) before it pays for its expenditure in cash (e.g. through payroll and invoices). It also holds reserves for future expenditure. These activities, plus the timing of borrowing decisions, lead to a cash surplus which is invested in accordance with guidance from the Chartered Institute of Public Finance and Accountancy. The balance of treasury management investments is expected to fluctuate between £56m and £200m during the 2023-24 financial year.
- 2.2 The contribution that these investments make to the objectives of the Authority is to support effective treasury management activities.

**3. Service Investments: Loans**

- 3.1 The Council may lend money to its subsidiaries and associates, local charities, housing associations and its employees to support local public services and stimulate local economic growth. For example, loans to PLACE Ltd and Oxford House.
- 3.2 The main risk when making service loans is that the borrower will be unable to repay the principal lent and/or the interest due. In order to limit this risk, and ensure that total exposure to service loans remains proportionate to the size of the Authority, upper limits on the outstanding loans to each category of borrower have been set as follows:

**Table demonstrating loans for service purposes**

Category of borrower	Actuals at 31.03.2022			2022-23
	Balance owing £m	Loss allowance £m	Net figure in accounts £m	Approved Limit £m
Subsidiaries & associates				
Seahorse	0.030	-	-	50.000
Place Ltd	0.646			
Mulberry Homes	0.010			
Local charities				
Oxford House	0.728	-		2.000
Employees	0.160	-		0.700
Sundry loan advances	0.601			
<b>TOTAL</b>	<b>2.175</b>	<b>-</b>		<b>52.700</b>

3.3 Loans to local charities relate to Oxford House. Employee loans relate to car loans, bicycle loans and train season tickets. Loans to subsidiaries and associates relate to PLACE Ltd, Seahorse Homes and Mulberry Homes.

3.4 Authority assesses the risk of loss before entering and whilst holding service loans. Accounting standards require the Authority to set aside loss allowance for loans, reflecting the likelihood of non-payment. However, the Authority makes every reasonable effort to collect the full sum lent and has appropriate credit control arrangements in place to recover overdue repayments. The Council is expecting full repayment on the loans to charities and employees.

#### **4. Service Investments: Shares**

4.1 The Council invests in shares of its subsidiaries to support provision of housing in the local community, local public services and stimulate local economic growth. The Council has nominal value shares in several companies< Tower Hamlets Local Education Partnership Ltd, Mulberry Housing, Seahorse Homes Ltd and Tower Hamlets Homes. Capital Letters is owned along with other London Boroughs, the company is limited by guarantee. The Council is one of 5 London Boroughs with shareholdings in PLACE Ltd. The company is limited by guarantee therefore the Council has no shareholdings in PLACE Ltd.

- 4.2 Seahorse Homes is a wholly owned company limited by shares established in 2017, to provide market rented homes and deliver a return on investments, both to cross-subsidise affordable housing and to fund wider General Fund services. The Council holds 10% of the shares in this company and has initially committed £6m in equity. The company has yet to start trading.
- 4.3 One of the risks of investing in shares is that they fall in value meaning that the initial outlay may not be recovered. In order, to limit this risk, upper limits on the sum invested in each category of shares have been set as follows:

**Table demonstrating shares held for service purposes**

Category of company	Actuals at 31.03.2022			2022-23
	Amounts invested £m	Gains or losses £m	Value in accounts £m	Approved Limit £m
Subsidiaries	6.00	-	6.00	6
Suppliers	-	-	-	-
<b>TOTAL</b>	<b>6.00</b>	<b>-</b>	<b>6.00</b>	<b>6</b>

- 4.4 **Risk assessment:** The Authority assesses the risk of loss before entering into, and whilst holding shares. The investments in Seahorse Homes Ltd will be turned into property-backed assets that have a long-term track record of value appreciation, although there may be short-term value falls. Legal and independent advice was obtained before the company was created.
- 4.5 **Liquidity:** Proposed investments and loans are longer term in nature. These investments will, therefore, not be used for short-term cash flow purposes. The maximum value of the investments is less than 20% of the Council's current investment portfolio.
- 4.5 **Non-specified Investments:** Shares are the only non-treasury investment type that the Authority has identified that meets the definition of a non-specified investment in the government guidance. The limits above on share investments are therefore also the Authority's upper limits on non-specified investments. The Authority has not adopted any procedures for determining further categories of non-specified investment since none are likely to meet the definition.

## **5. Loan Commitments and Financial Guarantees**

5.1 Loan commitments and financial guarantees are not strictly counted as investments since no money has exchanged hands yet, however these carry similar risks to the Authority and are included here for completeness.

5.2 The Council has historically provided financial guarantees on properties transferred to social landlords. No liabilities have been payable on these guarantees.

## 6. **Borrowing in Advance of Need**

6.1 Government guidance is that local authorities must not borrow more than or in advance of their needs purely in order to profit from the investment of the extra sums borrowed. This currently under borrowed and will not borrow in advance of its borrowing need except on advice from its advisers.

## 7. **Capacity, Skills and Culture**

7.1 A training plan is being produced for the training of elected members and Council officers attend regular training during the year.

7.2 To ensure corporate governance, the Audit Committee is presented with mid-year and outturn reports to enable the review of treasury management activities.

## 8. **Investment Indicators**

8.1 The Council has set the following quantitative indicators to allow elected members and the public to assess the Authority's total risk exposure as a result of its investment decisions.

8.2 **Total risk exposure:** The first indicator shows the Authority's total exposure to potential investment losses. This includes amounts the Authority is contractually committed to lend but have yet to be drawn down and guarantees that the Authority has issued over third party loans.

**Table demonstrating total investment exposure**

<b>Total investment exposure</b>	<b>31.03.2022 Actual £m</b>	<b>31.03.2023 Forecast £m</b>	<b>31.03.2024 Forecast £m</b>	<b>31.03.2025 Forecast £m</b>
Treasury management investments	321.200	177.279	56.000	56.000
Service investments: Loans	2.000	2.531	2.000	2.000
Service investments: Shares	-	-		
<b>TOTAL INVESTMENTS</b>	<b>323.200</b>	<b>179.810</b>	<b>58.000</b>	<b>58.000</b>
Commitments to lend	-	-		
Guarantees issued on loans	-	-		
<b>TOTAL EXPOSURE</b>	<b>323.200</b>	<b>179.810</b>	<b>58.000</b>	<b>58.000</b>

8.3 **How investments are funded:** Government guidance is that these indicators should include how investments are funded. Since the Authority does not normally associate individual assets with individual liabilities, this guidance is difficult to comply with. Some investments could be described as being funded by borrowing with the remainder of the Authority's investments being funded by usable reserves and income received in advance of expenditure.

8.4 **Rate of return received:** This indicator shows the investment income received less the associated costs, including the cost of borrowing where appropriate, as a proportion of the sum initially invested. Note that due to the complex local government accounting framework, not all recorded gains and losses affect the revenue account in the year in which they are incurred.

**Table demonstrating investment rate of return (net of all costs) 2023/24**

<b>Investments net rate of return</b>	<b>2021-22 Actual</b>	<b>2022-23 Forecast</b>	<b>2023-24 Forecast</b>	<b>2024-25 Forecast</b>
Treasury management investments	0.90%	1.50%	2.00%	1.50%
Service investments: Loans	-	-	-	
Service investments: Shares	-	-	-	
Commercial investments: Property	-	-	-	
<b>All Investments</b>	<b>0.90%</b>	<b>1.50%</b>	<b>2.00%</b>	<b>1.50%</b>

\*forecast return includes income returns from externally managed pooled funds

**1. Introduction**

- 1.1 This capital strategy gives a high-level overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of local public services in Tower Hamlets Council along with an overview of how associated risk is managed and the implications for future financial sustainability. It has been written in an accessible style to enhance members’ understanding of some of these technical areas.
- 1.2 Decisions made this year on capital and treasury management will have financial consequences for the Council for many years into the future. They are therefore subject to both a national regulatory framework and to local policy framework, summarised in this report.
- 1.3 Financing capital expenditure is where the Council spends money on assets, such as property or vehicles that will be used for more than one year. The Council has some limited discretion on what counts as capital expenditure.
- 1.4 In 2023-24, the Council is planning General Fund (£122.3m) and HRA (156.2m) capital expenditure as summarised below:

*Table 1: Prudential Indicator: Estimates of Capital Expenditure in £millions*

<b>Capital Expenditure</b>	<b>2021-22 Actual</b>	<b>2022-23 Revised Estimate</b>	<b>2023-24 Forecast</b>	<b>2024-25 Forecast</b>	<b>2025-26 Forecast</b>
Non-HRA	<b>106.331</b>	<b>111.867</b>	<b>122.281</b>	<b>80.875</b>	<b>35.482</b>
HRA	<b>52.102</b>	<b>74.458</b>	<b>156.185</b>	<b>139.331</b>	<b>94.109</b>
<b>Total</b>	<b>158.433</b>	<b>186.325</b>	<b>278.466</b>	<b>220.206</b>	<b>129.591</b>

*\*No adjustments for capital expenditure in 2024/25 arises from a change in the accounting for leases as these do not represent cash expenditure*

The main General Fund capital projects include work on the New Leisure Centre, waste and recycling, capital footway and public realm improvement and new infrastructure.

- 1.5 The Housing Revenue Account (HRA) is a ring-fenced account which ensures that council housing does not subsidise, or is itself subsidised, by other local services. HRA capital expenditure is therefore recorded separately and includes

the building of £311.3m of new homes over the forecast period 2023/24 to 2025/26 of which £181.6m is forecast to be funded from prudential borrowing.

- 1.6 **Governance:** Following an officer process, taking account of service priorities and Mayor’s Advisory Board approval. The final capital programme is then presented to Cabinet in January and to Council in February/ March each year.
- 1.7 All capital expenditure must be financed, either from external sources (government grants, CIL and other contributions), the Council’s own resources (revenue, reserves and capital receipts) or debt (borrowing, leasing and Private Finance Initiative). The planned financing of the above expenditure is as follows:

Table 2: Capital financing

	2021-22 Actual (reinstated)	2022-23 Estimate	2023-24 Budget	2024-25 Budget	2025-26 Budget
External resources	60.056	64.065	101.611	50.924	24.113
Capital resources	21.618	40.972	36.919	27.207	23.368

\* debt arising from changes to accounting for leases are not included in the above.

- 1.8 Debt is only a temporary source of finance, since loans and leases must be repaid. This is therefore replaced over time by other financing, usually from revenue which is known as Minimum Revenue Provision (MRP). Proceeds from capital receipts is also used to finance the capital program. Table 3 below shows the level of capital receipts used in place of debt finance. Planned MRP and use of capital receipts are as follows:

Table 3: Replacement of debt finance in £millions

	2021-22 Actual (restated) £m	2022-23 Budget (revised) £m	2023-24 Budget £m	2024-25 Budget £m	2025-26 Budget £m
Planned MRP Payments	11.158	13.015	17.235	18.709	21.389
Capital Receipts	10.794	8.076	12.874	8.952	17.168

\*capital program funded from capital receipts

## Minimum Revenue Provision (MRP) Policy Statement 2023/24

- 1.9 The Guidance requires the Council to approve an Annual MRP Statement each year and recommends a number of options for calculating a prudent amount of MRP. The following statement incorporates options recommended in the Guidance as well as locally determined prudent methods. This statement is consistent with that approved by the Council for 2022-23:
- 1.9.1 For supported capital expenditure MRP will be determined in accordance with the former regulations that applied on 31<sup>st</sup> March 2008, incorporating an “Adjustment A” of £17.5m. (*DLUHC Guidance Option 1 – the Regulatory Method*).
- 1.9.2 For unsupported capital expenditure incurred after 31 March 2008, MRP will be determined by charging over the expected useful life of the relevant asset in equal instalments, starting in the year after that in which the asset becomes operational. There are two areas where asset lives are bound by regulation. MRP on purchases of freehold land will be charged over 50 years. MRP on expenditure not related to fixed assets but which has been capitalised by regulation or direction will be charged over 20 years. (*DLUHC Guidance Option 3 – the Asset Life Method*).
- 1.9.3 For assets acquired by leases or the Private Finance Initiative, MRP will be determined as being equal to the element of the rent or charge that goes to write down the balance sheet liability (*per DLUHC Guidance*).
- 1.9.4 Where former operating leases are brought onto the balance sheet due to the adoption of the IFRS 16 Leases accounting standard, the asset values adjusted for accruals, prepayments then, the annual MRP charges will be adjusted so that the total charge to revenue remains unaffected by the new standard.
- 1.9.5 For loans to third parties that are required to be capitalised and are to be repaid in annual or more frequent instalments of principal, the Council will not make MRP but will instead apply the capital receipts arising from the principal repayments to finance this expenditure. In years where there is no principal repayment MRP will be charged based on the estimated life of the relevant asset. While this is not one of the options in the DLUHC Guidance, it is thought to be a prudent approach since it ensures that the capital expenditure incurred is fully financed.
- 1.9.6 Under the DLUHC Guidance MRP is not required to be charged in respect of assets held within the Housing Revenue Account (HRA). Following removal of the HRA debt cap by central government. The Council has determined to make a Voluntary Revenue Provision (VRP) on new HRA debt funded capital expenditure. VRP is charged over the expected useful life of the relevant assets

in equal instalments, starting in the year after that in which the assets become operational.

1.9.7 Where there is a change in policy from the previous year for any category of expenditure, this change will be reported to Council including reason why the change is prudent.

1.9.8 Capital expenditure incurred during 2023-24 will not be subject to a MRP charge until 2024-25 or later.

1.10 The Council's cumulative outstanding amount of debt finance is measured by the capital financing requirement (CFR). This increases with new debt-financed capital expenditure and reduces with MRP and capital receipts used to replace debt. The estimated CFR is expected to increase by £58.8m during 2023/24. Based on the above figures for expenditure and financing, the Council's estimated CFR is shown in the table 4 below.

Capital Financing requirement (CFR)	2021/22 Draft Actual £m	2022/23 Revised Estimate £m	2023/24 Estimate £m	2024/25 Estimate £m	2025/26 Estimate £m
Non-HRA CFR	365.673	387.658	394.281	410.305	407.511
HRA CFR	152.485	149.993	202.166	285.257	327.898
<b>Total</b>	<b>518.158</b>	<b>537.651</b>	<b>596.447</b>	<b>695.562</b>	<b>735.409</b>

1.11 No CFR increase have been made in respect of change in the accounting for leases.

1.12 **Asset management:** To ensure that capital assets continue to be of long-term use, the Council has an asset management strategy in place.

1.13 **Asset disposals:** When a capital asset is no longer needed, it may be sold so that the proceeds, known as capital receipts, can be spent on new assets or to repay debt. The Council is currently also permitted to spend capital receipts on service transformation projects. Repayments of capital grants, loans and investments also generate capital receipts. No specific capital receipts is earmarked to repay debt. The Council's Chief Accountant's team is responsible for the financing of capital projects in line with agreed project financing.

Table 5: Capital Receipts Receivable

	2022-23 Forecast £m	2023-24 Budget £m	2024-25 Budget £m	2025-26 Budget £m
Asset sales	16.667	13.334	10.667	8.534
Loans repaid	1.163	-	-	-
<b>TOTAL</b>	<b>17.83</b>	<b>13.334</b>	<b>10.667</b>	<b>8.534</b>

## 2 Treasury Management

- 2.1 Treasury management is concerned with keeping sufficient but not excessive cash available to meet the Council's spending needs, while managing the risks involved. Surplus cash is invested until required, while a shortage of cash will be met by borrowing, to avoid excessive credit balances or overdrafts in the bank current account. The Council is typically cash rich in the short-term as revenue income is received before it is spent, but cash poor in the long-term as capital expenditure is incurred before being financed. The revenue cash surpluses are offset against capital cash shortfalls to reduce overall borrowing.
- 2.2 As of 31 December 2022, the Council had £68.71m of borrowings at an average interest rate of 3.01% and £225.15m of treasury investments at an average rate of 2.71%.
- 2.3 **Borrowing strategy:** The Council's main objectives when borrowing, are to achieve a low but certain cost of finance while retaining flexibility should plans change in future. These objectives are often conflicting, and the Council therefore seeks to strike a balance between cheaper short-term loans and long-term fixed rate loans where the future cost is known but higher (PWLB certainty rates currently range from 4.36% to 4.45% without Certainty Rate adjustments). There are several factors that the Council needs to consider when setting its borrowing strategy. The Council does not borrow to invest for the primary purpose of financial return and therefore retains full access to Public Works Loans Board as its main source of borrowing.
- 2.4 The provisional capital programme is £628.3m over the next 3 financial years (2023-4 to 2025-26). This programme is partly funded by borrowing of £55.9m in both General Fund and HRA for 2023-26. The rest of the programme is being funded by other sources including payments from developers (CIL and Section 106), capital receipts and revenue contributions (the HRA). However, in previous years the capital programme has had major slippage, including in the current year.

- 2.5 The above increasing capital programme is taking place at a time when interest rates have risen and expected to continue to rise.
- 2.5 Projected levels of the Council’s total outstanding debt (which comprises borrowing, PFI liabilities and leases) are shown below, compared with the capital financing requirement.

Table 6: Prudential Indicator: Gross Debt and the Capital Financing Requirement in £millions

	2021-22 Actual (reinstated) £m	2022-23 Estimate £m	2023-24 Budget £m	2024-25 Budget £m	2025-26 Budget £m
Actual Debt (incl. PFI & leases)	127.891	123.355	117.768	113.346	108.922
Estimated New Borrowing	-	-	42.552	238.264	333.027
Total Debt	127.891	123.355	160.32	351.61	441.949
Capital Financing Requirement	465.745	537.651	596.447	695.562	735.409

\*table above excludes IFRS16 adjustments to balance sheet

- 2.8 Statutory guidance is that debt should remain below the capital financing requirement, except in the short-term. Table 6 above demonstrates that the Council expects to comply with this.
- 2.9 **Liability benchmark:** To compare the Council’s actual borrowing against an alternative strategy, a liability benchmark has been calculated showing the lowest risk level of borrowing. This assumes that cash and investment balances are kept to a minimum level of £76m at each year-end which is currently the level of investment in pooled funds. The table below shows the Council expects to remain borrowed above its liability benchmark.

Table 7: Borrowing and the Liability Benchmark in £millions

	31.3.22 Actual £m	31.3.23 Estimate £m	31.3.24 Forecast £m	31.3.25 Forecast £m	31.3.26 Forecast £m
Loans CFR	464.675	491.63	555.161	659.773	705.736

Net Loans Requirement	(235.025)	(107.970)	111.261	306.973	401.736
<i>Liquidity Allowance</i>	56.000	56.000	56.000	56.000	56.000
<b>Liability benchmark</b>	<b>(179.025)</b>	<b>(51.970)</b>	<b>167.261</b>	<b>362.973</b>	<b>457.736</b>

- 2.10 **Affordable borrowing limit:** The Council is legally obliged to set an affordable borrowing limit (also termed the authorised limit for external debt) each year and to keep it under review. In line with statutory guidance, a lower “operational boundary” is also set as a warning level should debt approach the limit.

Table 8: Prudential Indicators: Authorised limit and operational boundary for external debt.

	2021- 22 Limit £m	2022- 23 Limit £m	2023- 24 Limit £m	2024- 25 Limit £m	2025- 26 Limit £m
Authorised limit - borrowing	599.65	608.665	585.161	689.77	735.74
Authorised limit - PFI and leases	52.469	49.059	41.286	35.789	29.673
<b>Authorised limit - total external debt</b>	<b>652.12</b>	<b>657.724</b>	<b>626.447</b>	<b>725.56</b>	<b>765.41</b>
Operational boundary - borrowing	569.65	568.665	555.161	659.77	705.74
Operational boundary - PFI and leases	52.469	49.059	41.286	35.789	29.673
<b>Operational boundary - total external debt</b>	<b>622.12</b>	<b>617.724</b>	<b>596.447</b>	<b>695.56</b>	<b>735.41</b>

- 2.11 **Treasury Investment Strategy:** Treasury investments arise from receiving cash before it is paid out again. Investments made for service reasons or for pure financial gain are not generally considered to be part of treasury management.

- 2.12 The Council’s policy on treasury investments is to prioritise security and liquidity over yield that is to focus on minimising risk rather than maximising returns. Cash that is likely to be spent in the near term is invested securely, for example with

the government, money market funds or selected high-quality banks, to minimise the risk of loss. Money that will be held for longer terms is invested more widely, including in bonds, strategic pooled funds, shares and property, to balance the risk of loss against the risk of receiving returns below inflation. Both near-term and longer-term investments may be held in pooled funds, where an external fund manager makes decisions on which particular investments to buy, and the Council may request its money back at short notice.

Table 9: Treasury Management Investment forecast based on current capital program forecast

	<b>2021-22 Actual (draft)</b>	<b>2022-23 Estimate</b>	<b>2023-24 Budget</b>	<b>2024-25 Budget</b>	<b>2025-26 Budget</b>
Near-term investments	265.200	121.279	56.000	56.000	56.000
Longer-term investments	56.000	56.000	-	-	-
<b>TOTAL</b>	<b>321.200</b>	<b>177.279</b>	<b>56.000</b>	<b>56.000</b>	<b>56.000</b>

2.13 **Risk Management:** The effective management and control of risk are prime objectives of the Council's treasury management activities. The treasury management strategy therefore sets out various indicators and limits to constrain the risk of unexpected losses and details the extent to which financial derivatives may be used to manage treasury risks.

2.14 **Governance:** Decisions on treasury management investment and borrowing are made daily and are therefore delegated to the Corporate Director Resources and staff, who must act in line with the treasury management strategy approved by Council. The Audit Committee is presented with mid-year and outturn reports on treasury management activities. The Audit Committee is responsible for scrutinising treasury management decisions.

### **3 Investments for Service Purposes**

3.1 The Council makes investments to assist local public services, including making loans to its subsidiaries & associates, local charities, and its employees to support local public services and to stimulate economic growth. In light of the public service objective, the Council is willing to take more risk than with treasury investments, however it still plans for such investments to protect the real term value of the Council's financial assets.

- 3.2 Total investment for service purposes are currently valued at £2.145m with the largest being loans to Oxford House and PLACE Ltd.
- 3.3 **Governance:** Decisions on service investments are made by the relevant service manager in consultation with the Strategic Heads of Finance and Corporate Director Resources and must meet the criteria and limits laid down in the investment strategy. Most loans and shares are capital expenditure and purchases will therefore also be approved as part of the capital programme.

**4 Liabilities**

- 4.1 In addition to debt detailed above, the Council is committed to making future payments to cover its pension fund deficit (valued at £419m at 31 March 22). The Council is also at risk of having to pay for any defaults on loans by housing associations in connection with residential properties transferred to them by the Council, and the pension liabilities of Tower Hamlets Homes should the ALMO not be able to meet its pension obligations. As of 31 March 2022, the Tower Hamlets Homes pension fund had an IAS19 surplus of £8.4m. The Council has not put aside any money for these potential liabilities.
- 4.2 **Governance:** Decisions on incurring new discretionary liabilities are taken by service managers in consultation with the Strategic Heads of Finance and Corporate Director Resources. The risk of liabilities crystallising and requiring payment is reported in the Council’s accounts.

**5 Revenue Budget Implications**

- 5.1 Although capital expenditure is not charged directly to the revenue budget, interest payable on loans and MRP are charged to revenue. The net annual charge is known as financing costs; this is compared to the net revenue stream i.e., the amount funded from Council Tax, business rates and general government grants.

Table 10: Proportion of Financing Costs to Net Revenue Stream

	<b>2023-24 Budget Estimate £m</b>	<b>2024-25 Budget Estimate £m</b>	<b>2025-26 Budget Estimate £m</b>
Financing costs	19.301	20.775	23.455
Proportion of net revenue stream	4.55%	4.71%	5.17%

5.2 **Sustainability:** Due to the very long-term nature of capital expenditure and financing, the revenue budget implications of expenditure incurred in the next few years will extend in some cases for up to 50 years into the future.

## 6 **Knowledge and Skills**

6.1 The Council employs professionally qualified and experienced staff in senior positions with responsibility for making capital expenditure, borrowing and investment decisions. For example, the Interim Corporate Director Resources is a qualified accountant with over 30 years' experience and the Council pays for junior staff to study towards relevant professional qualifications including CIPFA.

6.2 Where Council staff do not have the knowledge and skills required, use is made of external advisers and consultants that are specialists in their field. The Council currently employs Arlingclose Limited as treasury management advisers and Savills as property consultants. This approach ensures that the Council has access to knowledge and skills commensurate with its risk appetite.

**PRUDENTIAL AND TREASURY MANAGEMENT INDICATORS FOR 2023-24**

<b>Capital Expenditure</b>	<b>2021-22 Actual (restated) £m</b>	<b>2022-23 Current £m</b>	<b>2023-24 Forecast £m</b>	<b>2024-25 Forecast £m</b>	<b>2025-26 Forecast £m</b>

## **Treasury Management Policy Statement**

The London Borough of Tower Hamlets defines the policies and objectives of its treasury management activities as follows: -

1. This organisation defines its treasury management activities as:  
“The management of the Council’s cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks”.
2. This organisation regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the organisation.
3. This organisation acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving best value in treasury management, and to employing suitable performance measurement techniques, within the context of effective risk management.”

### **Policy on use of an External Treasury Advisor**

The Council shall employ an external treasury advisor to provide treasury management advice and cash management support services. However, the Council shall control the credit criteria and the associated counter-party list for investments.

The Council recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented, and subjected to regular review.

## **Treasury Management Scheme of Delegation**

### **1. Council**

- receiving reports from the Audit Committee on treasury management policies, practices and activities
- approval of annual Treasury Management and Investment Strategy
- approval of annual Capital Strategy

### **2. Section 151 Officer**

- approval of/amendments to the organisation's adopted clauses and Treasury Management Policy Statement
- budget consideration and approval
- approval of the division of responsibilities
- approving the selection of external service providers and agreeing terms of appointment

### **3. Audit Committee**

- reviewing the treasury management policies, practices and activities and making recommendations to the responsible body
- receiving the mid-year and annual outturn reports
- receiving and reviewing regular monitoring reports and acting on recommendations

**Treasury Management Reporting Arrangement**

<b>Area of Responsibility</b>	<b>Council/Committee/ Officer</b>	<b>Frequency</b>
Treasury Management Strategy Statement / Annual Investment Strategy / Minimum Revenue Provision Policy / Capital Strategy Report	Council	Annually before the start of the financial year to which policies relate
Mid-Year Treasury Management Report	Audit Committee or Council	Annually during the financial year to which the report relates
Updates or revisions to the Treasury Management Strategy Statement / Annual Investment Strategy / Minimum Revenue Provision Policy / Capital Strategy Report	Audit Committee or Council	As necessary
Annual Treasury Outturn Report	Audit Committee or Council	Annually after the year end to which the report relates
Treasury Management Practices	Corporate Director, Resources	Annually
Scrutiny of Treasury Management Strategy Statement / Annual Investment Strategy / Capital Strategy	Overview and Scrutiny Committee (if called in) / Audit Committee	Annually before the start of the financial year to which the report relates
Scrutiny of Treasury Management Performance	Audit Committee	Quarterly

## GLOSSARY

Asset Life	How long an asset, e.g. a Council building is likely to last.
Borrowing Portfolio	A list of loans held by the Council.
Borrowing Requirements	The principal amount the Council requires to borrow to finance capital expenditure and loan redemptions.
Capitalisation direction or regulations	Approval from central government to fund certain specified types of revenue expenditure from capital resources.
CIPFA Code of Practice on Treasury Management	A professional code of Practice which regulates treasury management activities.
Capital Financing Requirement (CFR)	Capital Financing Requirement- a measure of the Council's underlying need to borrow to fund capital expenditure.
Certificates of Deposits	A certificate of deposit (CD) is similar to a fixed deposit with a bank but is more liquid as it can be sold to another counterparty should the need arise.
Commercial paper	Commercial paper is a discounted security issued by large corporations to obtain funds to meet short-term debt obligations.
Counterparties	Organisations or Institutions the Council lends money to e.g. Banks; Local Authorities and MMF.
Corporate bonds	A corporate bond is a bond issued by a corporation to raise debt funding.
Covered bonds	A covered bond is a corporate bond with one important enhancement: recourse to a pool of assets that secures or "covers" the bond if the originator (usually a financial institution) becomes insolvent. These assets act as additional credit cover.
Consumer Prices Index & Retail Prices Index (CPI & RPI)	The main inflation rate used in the UK is the CPI. The Chancellor of the Exchequer bases the UK inflation target for the Bank of England on the CPI. The CPI inflation target is set at 2%. The CPI differs from the RPI in that CPI excludes housing costs.
Credit Default Swap (CDS)	A derivative providing protection against counterparty default.

Credit Arrangements	Methods of Financing such as finance leasing
Credit Ratings	A scoring system issued by credit rating agencies such as Fitch, Moody's and Standard & Poors to indicate the financial strength of a counterparty.
Creditworthiness	The strength of a counterparty with regard to its chances of becoming insolvent and therefore defaulting.
Debt Management Office (DMO)	The DMO is an agency of the HM Treasury which is responsible for carrying out the Government's Debt Management Policy.
Debt Rescheduling	The refinancing of loans at different terms and rates to the original loan.
Depreciation Method	The spread of the cost of an asset over its useful life.
Gilts	Gilt-edged securities are bonds issued by the UK government to raise funding from investors to meet the fiscal deficit.
Interest Rate exposure	A measure of the impact movements in interest rates will have on the Council's debt cost and investment income budgets.
Impaired investment	An investment that has had a reduction in value to reflect changes that could impact significantly on the benefits expected from it.
LIBID	The London Interbank Bid Rate – it is the interest rate at which major banks in London are willing to borrow (bid for) funds from each other.
Money Market Fund (MMF)	A 'pool' of investments managed by a fund manager that invests in highly liquid short-term financial instruments. The Council can invest in these funds to maintain liquidity and gain the creditworthiness benefits of the diversified structure.
Monetary Policy Committee (MPC)	Committee designated by the Bank of England whose main role is to set monetary policy.
Minimum Revenue Provision (MRP)	This is the amount which must be set aside from the revenue budget each year to cover future repayment of the CFR.
Premium	Cost of early repayment of loan to PWLB to compensate for any losses that they may incur
Prudential Indicators	Set of rules providing local authorities borrowing for funding capital projects under a professional code of practice developed by CIPFA and providing measures of affordability and prudence reflecting the Council's Capital Expenditure, Debt and Treasury Management.

PWLB	Public Works Loan Board, a statutory body whose function is to lend money to Local Authorities (LAs) and other prescribed bodies.
Treasury bills (or T-bills)	Treasury bills (or T-bills) are short-term debt securities issued by the UK government to manage its cash position.
Unrated institution	An institution that does not possess a credit rating from one of the main credit rating agencies.
Unsupported Borrowing	Borrowing where costs are wholly financed by the Council.
