Denise Radley	The risk is increased if there was to be more than one incident at the same time.			All the control measures have been reviewed. The only outstanding measure is the implementation of the Clearview IT system. Training of BC champions has been arranged for 19 July 2019; thereafter the system will 'go live'.				
								The Clearview system has been procured and an implementation plan is in place. Until the 'go live' date we have a work around to manage the Business Impact assessment process. In order to minimise the risk we have required Business Continuity Champions to review their BC plans and to update the contact details of relevant staff. This is the major element of the June BIA revision. This process is complete. Training on the Clearview system has been arranged for 19 July for BC Champions. Once complete the system will be tested and then go live. N.B. Once Clearview is implemented there will no longer be the need to conduct twice yearly revisions of the BIA's as the system is live, unlike the current paper based process that is cumbersome.
