

Appendix 5- Tower Hamlets Mayor's Air Quality Funded Projects

First Round Projects

Applicant	Project Title/Description
St Luke's Primary School	Install a green screen around the nursery. The new leafy wall will help protect infants from toxic car fumes.
Poplar HARCA	Green Lean & Electric: Installing pollution absorbing plants and mosses at its new offices to improve local air quality. Staff will be encouraged to swap their cars for cycling, with funding for battery powered bikes and battery-powered landscaping equipment will be trialled with funding to replace 30 diesel tools.
Umbrellium/Marner Primary School	Pollution Exploers Tiny Pledges: working with up to 100 parents and children to teach them how they can reduce air pollution by changing their behaviour.
Swan Housing Association	Get Cycling: Using funding to teach 36 residents how to build their own bikes and cycle more, improving their health and the local environment
Tower Hamlets Community Housing	Installing electric charging points to support a move away from diesel powered cleaning vans to environmentally friendly electric ones.
Hester Buck	Poplar Detox Moss Wall: install a moss wall at Brion Place of Zetland Street, near to the A12. UEL will support the design and construction of the wall.
David Berridge	Mile End Air Pollution Monitoring: This project seeks to purchase an AQ Mesh unit to monitor air pollution near the junction of Grove Road and Mile End Road.
Laura Polazzi/Olga Primary	Green Screen and Air Monitoring Tubes: Installation of green screen in playground and monitoring using NO2 diffusion tubes

Second Round Projects

Applicant	Project Title/Description
East End Homes	Gardening made greener: Swapping to battery operated gardening equipment
Coffe Afrique	Tower Hamlets secondary school pollution awareness and community market outreach days: Promoting AQ awareness through school assemblies and community events
Women's Environmental Network	Air eQuality: Running participatory workshops and forum events focusing on raising awareness among women. Aiming to develop a toolkit for future replication
Citizens UK	Clear the air: Engage with 20 member institutions to raise awareness; engage with locals to ascertain barriers to behaviour change; teach people how to engage with the LA to report and improve AQ
Bromley-by-Bow Centre	Air aware: Target vulnerable people through links to the health centre. Recruit AQ champions, teach them how to monitor NOX and PM and develop a strategy based on findings
Trees for Cities	Planting healthy air in Woolmore Primary school: Planting trees and green screens. Comprehensive monitoring to complement this
Barts Health	Cleaner air for Tower Hamlets hospitals: An anti-idling campaign focused on ambulance drivers and minicabs. There will also be an engagement day on Clean Air Day
Shapla Primary School	Clean air border planting: Installing a green wall around Shapla Primary
Barts Health	Empowering health professionals in Tower Hamlets to provide air pollution advice to children with Asthma: Training health professionals to teach their patients about air pollution and how to reduce their emissions and exposure
Poplar HARCA	Go! Car-go! Bike scheme for Poplar Works: Purchasing cargo bikes for Poplar Works fashion hub
Sustrans	Air-Mazing schools Whitechapel: Promoting sustainable transport at four schools on the city fringe
CWC Environmental	Clean air for kids: Low pollution walking maps for Bow Schools: Chisenhale, Old Ford, Malmesbury and Olga School
St Paul's Way Primary School	Multi model school project - St Paul's Way Foundation Primary School: Project managed by Sustrans to promote modal shift at St Paul's Way Trust School
