

Tens / Event Plan Boat LiveWorks Hackney Wick

SIA Security will be provided by Twinings my regular security team for the last 4 years at all of my previous premises and events. Security will provide medical and welfare cover with the assistance of the myself as Management.

The proposed events are expected to be mainly pre purchased tickets and will not exceed the safe premises capacity identified in the emergency plans of 300. The demographic of the attendees is expected to be our more usual local clientele aged 20-45 mad up from the wide demographic of people who live in Hackney Wick. The offer will be drinks and local DJ's.

There will be three security booked, one static on front door, two to float internally, one for each area, who can assist front door as required. Shown on the site plan below:

Security Duties

Security will carry out random searches on entry, record attendance with mechanical clickers, sweep the premises regularly checking: fire exits, customer noise levels in outdoor areas, toilets and customer welfare.

Security will also take up appointed roles in an evacuation, & provide medical and welfare assistance.

Security will ensure that doors and windows are kept shut after 22:00 and that during dispersal customers leaving the premises are asked to do so quietly with respect for our neighbours.

Welfare

We will provide drinking water for free and have signage at the bars, there will be a first aid kit at each bar, security will carry out welfare checks on their patrols and we have in place ask for Angela signage with staff training to support this.

Dispersal plan

1. All patrons will be reminded to leave the area quietly and signage stating "please respect our neighbours and leave the area quietly" will be in place.
2. Sia security will monitor the street and front door and will be on site until the site is clear.
3. No open containers of alcohol will be permitted to be removed from the site.
4. Security will prevent people staying on the street after any show has finished by asking them to move along politely.
5. Visitors will be encouraged to wait inside if they have ordered a taxi until it arrives to reduce the impact on the street.
6. Security will assist in the management of taxis on the street, reminding them not to use their horns and marshalling vehicle movement if required.

Noise & Nuisance Management

Throughout the two events I will use a acoustic level spectrometer to look for peaks in noise frequencies that may be causing nuisance around the perimeter of the site. I will also take comparative reads inside the boat and Lounge structures to see what frequencies are actually being created by sound reproducing systems.

This will allow me to take action during the events to minimise the sound breakout and to will provide notes to allow for better design of acoustic sound reduction treatments moving forwards.

I will happily provide a copy of this report to the Environmental Health Enforcement team should they so wish.
