3. Capacity & Demand

Selected Health and Wellbeing Board:

Guidance on completing this sheet is set out below, but should be read in conj

3.1 Demand - Hospital Discharge

This section requires the Health & Wellbeing Board to record expected monthly Data can be entered for individual hospital trusts that care for inpatients from tl The template aligns to the pathways in the hospital discharge policy, but separat

If there are any trusts taking a small percentage of local residents who are admi The table at the top of the screen will display total expected demand for the are Estimated levels of discharge should draw on:

- Estimated numbers of discharges by pathway at ICB level from NHS plans for
- Data from the NHSE Discharge Pathways Model.
- Management information from discharge hubs and local authority data on rec

You should enter the estimated number of discharges requiring each type of sur

3.2 Demand - Community

This section collects expected demand for intermediate care services from commumber of people requiring intermediate care (non-discharge) each month, split Further detail on definitions is provided in Appendix 2 of the Planning Requirem The units can simply be the number of referrals.

3.3 Capacity - Hospital Discharge

This section collects expected capacity for services to support people being disc

- Social support (including VCS)
- Reablement at Home
- Rehabilitation at home
- Reablement in a bedded setting
- Rehabilitation in a bedded setting
- Other short term social care
- Short-term residential/nursing care for someone likely to require a longer-ter

Please consider the below factors in determining the capacity calculation. Typical Caseload (No. of people who can be looked after at any given time)

Average stay (days) - The average length of time that a service is provided to per Please consider using median or mode for LoS where there are significant outlies Peak Occupancy (percentage) - What was the highest levels of occupany expression many people, on average, that can be provided with services.

At the end of each row, you should enter estimates for the percentage of the se

3.4 Capacity - Community

This section collects expected capacity for community services. You should inpu You should include expected available capacity across these service types for eli split into 5 types of service:

- Social support (including VCS)
- Urgent Community Response
- Reablement or rehabilitation at home
- Other short-term social care
- Rehabilitation in a bedded setting

Please consider the below factors in determining the capacity calculation. Typical Caseload (No. of people who can be looked after at any given time)

Average stay (days) - The average length of time that a service is provided to pe Please consider using median or mode for LoS where there are significant outlie Peak Occupancy (percentage) - What was the highest levels of occupany express take into account how many people, on average, that can be provided with serv

At the end of each row, you should enter estimates for the percentage of the se

Virtual wards should not form part of capacity and demand plans because they I Appendix 2 of the BCF Planning Requirements.

Any assumptions made.

Please include your considerations and assumptions for Length of Stay and average numbers of hours committed to a homecare package that have been used to derive the number of expected packages.

ervice in question that is commissioned by the local authority, the ICB and jointly.

represent acute, rather than intermediate, care. Where recording a virtual ward as a referral source, pease

UCR demand is based on CSDS reported activty. There are no commissioned intermediate care beds in Tower Hamlets. Where there is a requirement for an intermediate bed, adhoc arrangements are made with neighbouring boroughs.

VCS - there are no commissioned activity via VCS for intermediate care in the community Reablement: We have applied a 10% increase in overall demand for Reablement services compared to 21/22, then apportioned 30% of the overall to 'community'. This apportionment reflects the historic demand split between community and discharge pathway.
