

IMPROVING TOWER HAMLETS

Our Performance Framework

Plan

Thanks to our careful planning we've delivered more affordable housing than any other local authority in the country.

716 households are now enjoying the award-winning new homes on the Ocean Estate, and even more new homes are planned.

Do

Our performance framework supports the delivery of outcomes for local people.

Education and attainment for our young people has consistently improved over the last seven years.

GCSE attainment rose again this year, and results are better than the national average.

Monitor

Careful monitoring of delivery against our priorities means that the borough has never been cleaner or greener.

Recycling levels are at an all time high and the amount of litter on the streets has consistently decreased over the last three years.

Improve

We learn from all we do and listen to our residents.

We have transformed adult social care through listening to service users.

We're now investing in even more preventative work to keep people well and independent in their own homes.
