### **Mudchute Farm Festival**

I have been made aware of the proposed TEN's license application for a music festival in Mudchute farm for 24<sup>th</sup> July. I was made aware that other important planning documents was not included with the license application. For our department to correctly assess the proposed event we would require to see all documents for this event. Also the timeframe from when the license was submitted to the date of the event does not provide sufficient time to go through the organiser plans.

Our licensing department informed us that they have made a formal object to the license application based on the lack of information provided. We fully support their objection and will continue to do so until more information is provided to us.

If you require further information of my concerns please let me know and I can provide in more detail.

Regards
