

1. Background and Context

- 1.1. Sections 32 and 43 of the Local Government Finance Act 1992 require local authorities to consider the level of reserves when setting a budget requirement. Section 25 of the Local Government Act 2003 requires the Chief Financial Officer (Section 151 Officer) to report formally on the adequacy of proposed reserves when setting a budget requirement. The accounting treatment for reserves is set out in the Code of Practice on Local Authority Accounting.
- 1.2. CIPFA has issued Local Authority Accounting Panel (LAAP) Bulletin No.55, Guidance Note on Local Authority Reserves and Balances and LAAP Bulletin 99 (Local Authority Reserves and Provisions). Compliance with the guidance is recommended in CIPFA's Statement on the Role of the Chief Financial Officer in Local Government.
- 1.3. This policy sets out the Council's approach for compliance with the statutory regime and relevant non-statutory guidance.
- 1.4. Reserves are an important part of the Council's financial strategy and are held to create long-term budgetary stability. They enable the Council to manage change without undue impact on the Council Tax and are a key element of its strong financial standing and resilience. The Council's key sources of funding face an uncertain future and the Council therefore holds earmarked reserves and a working balance in order to mitigate future financial risks.
- 1.5. Earmarked reserves are reviewed annually as part of the budget process, to determine whether the original purpose for the creation of the reserve still exists and whether or not the reserves should be released in full or in part. Particular attention is paid in the annual review to those reserves whose balances have not moved over a three year period.

2. Overview

- 2.1. The Council's overall approach to reserves will be defined by the system of internal control. The system of internal control is set out, and its effectiveness reviewed, in the Annual Governance Statement. Key elements of the internal control environment are objective setting and monitoring, policy and decision-making, compliance with statute and procedure rules, risk management, achieving value for money, financial management and performance management.
- 2.2. The Council will maintain:
 - a general fund general reserve;
 - a housing revenue account (HRA) general reserve; and
 - a number of earmarked reserves.
- 2.3. Additionally, the Council is required to maintain **unusable** reserves to comply with accounting requirements although, as the term suggests, these reserves are not available to fund expenditure.
- 2.4. The level of the general reserve is a matter for the Council to determine having had regard to the advice of the S151 Officer. The level of the reserve will be a matter of judgement which will take account of the specific risks identified through the various corporate processes. It will also take account of the extent to which specific risks are supported through earmarked reserves. The level will be expressed as a cash sum over the period of the general fund medium-term financial strategy. The level will also be expressed as a percentage of the general funding requirement (to provide an indication of financial context).
- 2.5. In principle, only the income derived from the investment of reserve funds should be available to support recurring spending.

3. Strategic context

- 3.1. The Council is facing a significant withdrawal of grant funding and the transfer of funding risk from Government with demand for at least some services forecast to grow. The Council has to annually review its priorities in response to these issues.
- 3.2. Reserves play an important part in the Council's medium term financial strategy and are held to create long-term budgetary stability. They enable the Council to manage change without undue impact on the Council Tax and are a key element of its strong financial standing and resilience.

- 3.3. The Council holds reserves in order to mitigate future risks, such as increased demand and costs; to help absorb the costs of future liabilities; and to enable the Council to resource policy developments and initiatives without a disruptive impact on Council Tax.
- 3.4. Capital reserves play a crucial role in funding the Council's Capital Strategy. The Capital Expenditure Reserve is used to create capacity to meet future capital investment.
- 3.5. The Council relies on interest earned through holding reserves to support its general spending plans.
- 3.6. Reserves are one-off money. The Council aims to avoid using reserves to meet ongoing financial commitments other than as part of a sustainable budget plan. The Council has to balance the opportunity cost of holding reserves in terms of Council Tax against the importance of interest earning and long term future planning.

4. Purposes

- 4.1. Reserves are therefore held for the following purposes, some of which may overlap:
 - Providing a working balance i.e. Housing Revenue Account and General Fund general reserves.
 - Smoothing the impact of uneven expenditure profiles between years e.g. local elections, structural building maintenance and carrying forward expenditure between years.
 - Holding funds for future spending plans e.g. Capital Expenditure Reserve, and for the renewal of operational assets e.g. repairs and renewal, and Information Technology renewal.
 - Meeting future costs and liabilities where an accounting 'provision' cannot be justified.
 - Meeting future costs and liabilities so as to cushion the effect on services e.g. The Insurance Reserve for self-funded liabilities arising from insurance claims.
 - To provide resilience against future risks.
 - To create policy capacity in a context of forecast declining future external resources e.g. Tackling Poverty Reserve.
- 4.2. All earmarked reserves are held for a specific purpose. This, together with a summary on the movement on each reserve, is published annually, to accompany the annual Statement of Accounts.
- 4.3. The use of some reserves is limited by regulation e.g. the Collection Fund balance must be set against Council Tax levels, reserves established through the Housing Revenue Account can only be applied within that account and the Parking Reserve can only be used to fund specific spending. Schools reserves are also ring-fenced for their use, although there are certain regulatory exceptions.

5. Management

- 5.1. All reserves are reviewed as part of the budget preparation, financial management and closing processes. The Council will consider a report from the S151 Officer on the adequacy of the reserves in the annual budget-setting process and receive his/her advice on the use of reserves. The report will contain estimates of reserves where necessary. The Audit Committee will review the balances of reserves when approving the statement of accounts each year.
 - 5.2. In accordance with the Council's constitution, authorisation of the use of reserves is given by the S151 Officer.
 - 5.3. The following matters apply to individual reserves:
 - The General Fund working balance will not fall below £20 million without the approval of The Council.
 - The Capital Expenditure Reserve is applied to meet future investment plans and is available either to fund investment directly or to support other financing costs. The reserve can also be used for preliminary costs of capital schemes e.g. feasibility.
 - The Parking Reserve will be applied to purposes for which there are specific statutory powers. This is broadly defined as transport and environmental improvements (the latter as defined in the Traffic Management Act 2004).
 - The Schools Reserve, the Insurance Reserve, and the Barkantine (PFI Reserve) are clearly defined and require no further authority for the financing of relevant expenditure.
 - 5.4. The Council will review the Reserves Policy on an annual basis.
-
